Tools for the toughest demands

Dear Festool customers,

welcome to a world full of exciting new Festool developments. They all have one thing in common: They all make your work easier – day in, day out, in the workshop or on the construction site.

In 2021, an especially practical innovation will allow us to help you make your machines mobile in no time. Want to work with a hammer drill or table saw without relying on a generator or construction site power supply? Not a problem: With our portable electrical outlet module, the new SYS-PowerStation, you always have enough power on hand to work without a mains power supply and with no output losses for an entire day. Read page 324 to find out more.

Make the most of your new independence by using our new PLANEX LHS 2 225 long-reach sander – now with an integrated LED light ring. This innovative function enables you to detect unevenness during the sanding process in order to achieve perfect, score-free surfaces without time-consuming rework.

I hope you enjoy browsing and discovering what's in store. Sincerely,

John Mark

Barbara Austel Shareholder

New Festool products for 2021.

Long-reach sander PLANEX LHS 2 225

The circumferential LED ring light functions like an integrated spotlight, revealing any unevenness during sanding itself. The eccentric sanding movement creates perfect-quality surfaces.

>> Page 116

Systainer³

Hand tools can be stored quickly and kept to hand using the Systainer³ ToolBox. If you need more storage space, the Systainer³ XXL is available.

>> Page 317

SYS-PowerStation

The portable electrical outlet module provides power where there would otherwise be none. Enough power for a full working day and all mains powered tools. The result is that every construction site operation can be safely planned.

TKS 80 table saw

Your fingers - invaluable! Thanks to the innovative SawStop technology in the TKS 80 table saw, the risk of most serious cutting injuries during sawing is reduced.

>> Page 62

Saw table and work bench STM 1800

In conjunction with the portable circular saw, guide rail and FS-WA/90° angle stop, the saw table and work bench turn into a mobile panel saw.

TID 18 cordless impact driver

Offers an impressive service life thanks to its extremely robust hammer mechanism and new brushless EC-TEC motor. The kickback-free tangential hammer mechanism protects your wrist.

>> Page 200

CT RENOFIX mobile dust extractors

The perfect construction site extractors: Deal with even large amounts of dust thanks to automatic cleaning, guaranteeing consistently high extraction power.

>> Page 171

Stirrers with dust extraction

Robust, ergonomic, dust-free -Festool stirrers now come with extraction. No more thick clouds of dust!

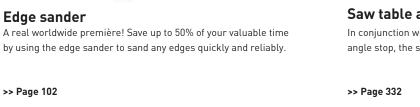

>> Page 278

Bluetooth® TOPROCK speaker

Tools underneath and music on top: The **Bluetooth®** speaker integrated in the Systainer³ lid guarantees full-on sound throughout your workspace and fits perfectly into the Systainer system.

Festool SERVICE

Uncompromising performance.

Direct, practical and comprehensive service for you and your tools. In addition to excellent tools, we also offer you services of an outstanding quality. We do everything in our power to ensure that you are satisfied and that you place your trust in Festool. After all, we are only satisfied when you are too.

Warranty all-inclusive Your performance assured.

Benefit from the wide range of services that are part of our Warranty all inclusive. After registering your new Festool tool, it is fully covered during the first three years, allowing you to concentrate on what really matters: Your work.*

3 year warranty.

For us, it almost goes without saying that we will replace faulty components free of charge – for fully three years.**

Original parts guaranteed.

We guarantee the availability of every spare part for at least ten years after discontinuation of the tool model. And in the unlikely event that we do not have the part you require in stock, you will receive a new tool free of charge.

Professional repair.

Quick, thorough and absolutely professional. Our qualified experts make sure that your tool is back in your hands in the shortest possible time.

Register quickly. Enjoy the benefits for a long time.

Register with your MyFestool account or directly in the Festool WorkApp up to 30 days after purchase to ensure that you benefit from all our services: www.festool.com/myfestool*

* Warranty all-inclusive is valid for all Festool tools registered within 30 days of purchase. The Festool warranty terms and conditions shall apply and are available at www.festool.com/service

The service offer may differ according to country and importer. The MyFestool account respectively the Festool Apps are not available in all countries. Please contact your local dealer.

** The offer for "full repair, free of charge" does not apply for damage to consumables and accessories, misuse, damage caused by the use of non-original accessories or spare parts, nor in the case of tools which have been dismantled or subjected to constant, hard-wearing use. Wear parts are excluded.

MyFestool Your details just a click away.

With your personal account, you have access to customised information and direct contact with Festool at all times. As a result, you will always be able to take advantage of the full range of services.

Register now for free: www.festool.com/myfestool*

- > Personal online area with individual information and exclusive content
- > Quick registration of your tools for warranty all-inclusive
- > Overview of your registered tools and their warranty periods
- > All warranty certificates at a glance
- Simplified search for accessories and spare parts

Full repair Your tool, repaired by experts.

Trained experts will take care of your tools with diligence, efficiency and a wealth of expertise. We offer more than just repair services – as part of our warranty all-inclusive**, repairs are even free of charge for the first three years.

- General overhaul of your tool including maintenance, inspection and adjustment
- Experienced service technicians
- > Use of original spare parts
- > Comprehensive check with electrical safety test

Your tool repaired by experts

Regularly trained professionals in the repair service take care of your tools – so you can concentrate on what really matters: your work.

* The MyFestool account respectively the Festool Apps are not available in all countries. Please contact your local dealer. ** The service offer may differ according to country and importer.

Hello hotline! Your contact for all queries.

The direct line to Festool is always the best choice if you want to receive answers to your questions quickly and simply. Whether you require advice, support or repair – we are always happy to hear from you.

You can find your local contact details on our website.

Battery packs and chargers

For greater ease when working.

Whether personal preferences or applicationspecific requirements, you will no doubt have certain standards for your tool. What if, instead of trying to find endless compromises, a solution existed that combined everything into one and made everyday work noticeably easier? In the following pages, you can find out more about our tailor-made cordless solutions. Discover how these can provide you optimum support – on a day-to-day basis.

For superior sawing.

If precise cuts, maximum performance and perfectly fitting insulation are in demand, Festool's mobile battery-powered sawing solutions will make your life more enjoyable.

Cordless circular saw **HKC 55**

With its even weight distribution and the FSK cross cutting guide rail with stop system, the HKC 55 cordless circular saw is the mobile solution for precise sawing in any position.

| Technical data | HKC 55 |
|------------------------------|--------|
| Battery voltage (V) | 18 |
| Idle engine speed (RPM) | 4.500 |
| Saw blade diameter (mm) | 160 |
| Angular range (°) | 0 – 50 |
| Cutting depth 0°, 90° (mm) | 0 – 55 |
| Cutting depth 45°/50° (mm) | 42/38 |
| Li-ion battery capacity (Ah) | 5,2 |
| Weight with Li-ion (kg) | 4,1 |

Concentrated power

The combination of 18 V Li-ion AIRSTREAM battery pack and brushless EC-TEC motor with integrated motor management guarantees impressive cutting performance. Without the need for power outlets and cables.

Cordless plunge-cut saw **TSC 55**

The TSC 55 cordless plunge-cut saw with its double battery system is perfect for precise, splinter-free plunge cuts with strong traction – the same performance as in mains operation.

| Technical data | TSC 55 |
|-------------------------------|---------------------|
| Battery voltage (V) | 18/36 |
| Idle engine speed (RPM) | 2.650 - 3.800/5.200 |
| Saw blade diameter (mm) | 160 |
| Angular range (°) | -1 - 47 |
| Cutting depth (mm) | 0 – 55 |
| Cutting depth 45° (mm) | 43 |
| Li-ion battery capacity (Ah) | 5,2 |
| Weight 1 x 18 V/2 x 18 V [kg] | 4,6/5,3 |

2 x 18 V for greater endurance and range

The dual battery system with flexible configuration options for using one (at least 18 V) or two battery packs (max. 36 V). For maximum power or minimum weight.

You can find more information on page 40

Cordless insulating-material saw **ISC 240**

A weight of just 2.4 kg and a cutting depth of up to 350 mm makes the ISC 240 cordless insulation saw the first choice for effortless insulation cutting.

| Technical data | ISC 240 |
|--------------------------------------|---------|
| Battery voltage (V) | 18 |
| Stroke rate (RPM) | 3.000 |
| Cutting depth (mm) | 240 |
| Stroke length (mm) | 26 |
| Dust extraction connection dia. (mm) | 27 |
| Li-Ion battery capacity (Ah) | 4 |
| Weight with Li-Ion battery (kg) | 2,4 |

Fast and flexible

Perfectly coordinated cutting sets enable fast, clean and precise cutting of flexible mineral and natural fibre insulating materials as well as PUR insulating boards.

Cordless pendulum jigsaws CARVEX PSC 420 CARVEX PSBC 420

When perfect handling is required for any radius, the cordless pendulum jigsaws with maximum cutting performance and ideal curve handling are enticing options. Available with either an ergonomic soft grip or with a convenient handle.

| Technical data | PSC 420 | PSBC 420 |
|-------------------------------------|---------------|---------------|
| Battery voltage (V) | 18 | 18 |
| Stroke rate (RPM) | 1.500 - 3.800 | 1.000 - 3.800 |
| Pendulum cover adjustment in stages | 4 | 4 |
| Cutting depth in wood (mm) | 120 | 120 |
| Cutting depth in steel (soft) (mm) | 10 | 10 |
| Li-ion battery capacity (Ah) | 4 | 4 |
| Weight with Li-ion (kg) | 2,3 | 2,3 |

Perfect combination of power and flexibility

With 3800 strokes per minute, the high-performance, energy-efficient EC-TEC motor gives you powerful, fast sawing progress every time.

You can find more information on page 26

Cordless oscillator **VECTURO OSC 18**

With the StarlockMax tool holder along with sophisticated positioning and dust extraction accessories – the VECTURO OSC 18 is the intelligent system solution for the highest demands for performance, comfort and precision for dust-free sawing, scraping and cutting.

| Technical data | 0SC 18 |
|---------------------------------|-----------------|
| Battery voltage (V) | 18 |
| Oscillation (RPM) | 10.000 - 19.500 |
| Oscillation angle | 2 x 2° |
| Tool holder | StarlockMax |
| Li-lon battery capacity (Ah) | 4 |
| Weight with Li-lon battery (kg) | 1,8 |

You can find more information on page 80

Sophisticated

Optional system accessories make it possible to create precisely guided plunge cuts and saw with minimal dust generation – even when working above head height.

For more relaxed sanding.

Perfect ergonomics is one of the key features that allows your tool to provide you with useful support in your daily routine – and not just when it comes to sawing, drilling and screwdriving. Like all Festool battery solutions, our sanding tools are ergonomically designed to ensure full freedom of movement and mobility.

Cordless eccentric sander Cordless edge sander ETSC 125 ES-ETSC 125

The compact ETSC 125 cordless eccentric sander with its ergonomic design and light weight of only 1.4 kg allows for effortless sanding in any situation. Also available as a cordless edge sander – save up to 50% of your time compared to working with a sanding block.

| Technical data | ETSC 125 | ES-ETSC 125 |
|---------------------------------------|----------------|----------------|
| Battery voltage (V) | 18 | 18 |
| Eccentric motion speed (RPM) | 6.000 - 10.000 | 6.000 - 10.000 |
| Sanding stroke (mm) | 2 | 2 |
| Interchangeable sanding pad dia. (mm) | 125 | 125 |
| Angle adjustment (°) | - | 43 - 92 |
| Edge height (mm) | - | 5 – 60 |
| Li-ion battery capacity (Ah) | 3,1 | 3,1 |
| Weight with Li-ion (kg) | 1,4 | 2,2 |

Complete cordless mobility without hoses or cables With the edge sander, you can effortlessly sand small and large workpieces, narrow and wide edges (5–60 mm), sloped surfaces (43–92°) and external curves on the outline (e.g. on a round dining table). You can work up to the inside corners.

RUTSCHER cordless orbital sander **RTSC 400**

With a particularly compact and low design and a narrow 18 V Ergo battery pack, this is the right choice for small and narrow surfaces.

| RTSC 400 |
|----------------|
| 18 |
| 6.000 - 10.000 |
| 2 |
| 80 x 130 |
| 3,1 |
| 1,4 |
| |

You can find more information on page 104

Unique: With battery or cable

For all applications which require an even longer operating performance, the 18 V Bluetooth[®] Ergo battery pack* can be replaced with the plug it-mains adapter (included in the set and available as an accessory). This alone creates a mains powered machine with an unlimited running time in combination with the plug it-cable - ideal in conjunction with a Festool mobile dust extractor.

Cordless delta sander **DTSC 400**

Perfect for corners and edges. With the iron-shaped sanding pad, the DTSC cordless delta sander delivers the best sanding results even in tight spots. And the 18 V Bluetooth® Ergo battery pack* in combination with the brushless EC-TEC motor provides plenty of power, similar to that of a mains-powered tool.

| Technical data | DTSC 400 |
|----------------------------------|----------------|
| Battery voltage (V) | 18 |
| Idle engine speed (RPM) | 6.000 - 10.000 |
| Sanding stroke (mm) | 2 |
| Interchangeable sanding pad (mm) | 100 x 150 |
| Li-ion battery capacity (Ah) | 3,1 |
| Weight with Li-ion (kg) | 1,4 |

Less reworking PROTECTOR for smooth sanding along window surfaces, frames and panelling.

01 Cordless solutions

For greater calm when drilling and screwdriving.

Fast drilling, powerful screwdriving or quickly switch between both. You will find your tailormade solution in the Festool range. Smart details, such as the CENTROTEC quick-change system and the FastFix attachments help you in all situations.

Cordless drill QUADRIVE DRC 18/4 QUADRIVE PDC 18/4

With four-gear metallic gearbox, speeds of up to 3800 rpm, switchable axial stroke and the smart FastFix interface for rapid, tool-free conversion – the PDC 18/4 cordless percussion drill is the solution for power and endurance when drilling and screwdriving. Available without impact as the powerful DRC cordless drill.

| Technical data | DRC 18/4 | PDC 18/4 |
|---------------------------------------|---------------------|---------------------|
| Battery voltage (V) | 18 | 18 |
| Idling speed, 1st gear/2nd gear (RPM) | 0 - 400/0 - 850 | 0 - 400/0 - 850 |
| Idling speed, 3rd/4th gear (RPM) | 0 - 1.850/0 - 3.800 | 0 - 1.850/0 - 3.800 |
| Max. torque, wood/steel (Nm) | 40/60 | 40/60 |
| Drilling diameter, wood/steel (mm) | 50/13 | 50/13 |
| Drilling diameter in brickwork (mm) | - | 10 |
| Li-Ion battery capacity (Ah) | 4/5,2 | 4/5,2 |
| Weight with Li-Ion battery (kg) | 1,8/1,9 | 1,9/2 |

20% lighter

The Li-HighPower Compact battery pack is powerful enough for any application thanks to the Li-HighPower cell technology. Weighing not even 600 grams, it is also 20% lighter than a 5.2 Ah standard battery pack.

Cordless drill C 18 T 18+3

The C 18 and T 18+3 cordless drills feature completely electronic torque adjustment, the CENTROTEC quick-change system, as well as angle attachment, eccentric adapter and depth stop – making them ideal solutions for fast work in all drilling and screwdriving applications.

| Technical data | C 18 | T 18+3 |
|---------------------------------------|-------------------|-------------------|
| Battery voltage (V) | 18 | 18 |
| Idling speed, 1st gear/2nd gear (RPM) | 0 - 450/0 - 1.500 | 0 - 450/0 - 1.500 |
| Max. torque, wood/steel (Nm) | 27/45 | 35/50 |
| Drilling diameter, wood/steel (mm) | 40/13 | 45/13 |
| Torque adjustment 1st/2nd gear (Nm) | 0,8 - 8/0,5 - 6 | 0,8 - 8/0,5 - 6 |
| Li-Ion battery capacity (Ah) | 3,1/4 | 3,1/4 |
| Weight with Li-lon battery (kg) | 1,5/1,7 | 1,5/1,7 |

You can find more information on page 193

The TID 18 offers an impressive service life thanks to its extremely robust hammer mechanism. The turning screw will take the full force of the TID 18 with its ¼" tool holder – with no strain at all on your wrist: This is thanks to the tangential hammer mechanism with no strength-sapping back torque.

| NEW | |
|-----|-----|
| | |
| | - A |

| Technical data | TID 18 |
|---|-----------------------------------|
| Battery voltage (V) | 18 |
| Idle engine speed, 1st/2nd/3rd gear (RPM) | 0 - 1.200/ 0 - 2.000/0 - 3.200 |
| Max. number of strokes (RPM) | 4.500 |
| Max. torque (Nm) | 180 |
| Tool holder | 1/4" |
| Li-Ion battery capacity (Ah) | 3,1/4 |
| Weight with Li-Ion battery (kg) | 1,3/1,5 |

Zero maintenance

The perfect combination of the new-generation brushless EC-TEC motor and the battery pack ensure maximum endurance, even with high performance.

You can find more information on page 200

Impressively flexible Quick change of applications thanks to the FastFix interface.

Cordless hammer drill **BHC 18**

With vibration damping and a weight of just 2.5 kg, the BHC 18 cordless hammer drill is the solution for maximum drilling comfort. The Bluetooth® battery packs* start the mobile dust extractor automatically for dust-free, comfortable working with a drilling dust nozzle

| Technical data | BHC 18 |
|---------------------------------|----------|
| Battery voltage (V) | 18 |
| Max. number of strokes (RPM) | 4.895 |
| Drilling dia. (concrete) (mm) | 18 |
| Single impact energy (J) | 1,8 |
| Tool holder | SDS-Plus |
| Li-Ion battery capacity (Ah) | 3,1/4 |
| Weight with Li-lon battery (kg) | 2,3/2,5 |

Powerhouse

Unbeatable power to weight ratio thanks to the combination of EC-TEC motor and C shape model.

You can find more information on page 202

Li-HighPower Compact battery pack: Full power at a low weight.

In order to ensure that work is as non-fatiguing as possible, the Li-HighPower Compact battery has a reduced weight, with no detriment to performance. Thanks to the Li-HighPower cell technology, it is powerful enough for any application. With a weight of under 600 grams, it is both 20% lighter and 50% more compact than a 5.2 Ah standard battery pack.

Fully reliable

Thanks to their high-current rechargeable cells, the Li-HighPower Compact batteries are extremely durable. And, naturally, they are fully covered by the comprehensive support provided by Festool Service.

Built-in convenience

The Bluetooth® version of the Li-HighPower battery pack* safeguards your health, starting a connected mobile dust extractor automatically when the tool is switched on

Vibration and emissions values can be found in the operating manual at www.festool.com/vibration You can find more information on Bluetooth® Autostart on page 23 * The versions with Bluetooth® technology are not available in all countries. Please contact your local dealer for further information.

Cordless drywall screwdrivers **DURADRIVE DWC 18**

Its design and the tool-free change to magazine attachment make the DWC 18 cordless drywall screwdriver the first choice for fast and precise one-handed screwdriving. Here, the electronic screw depth mechanism ensures the exact screwing depth.

| Technical data | DWC 18-2500 | DWC 18-4500 |
|-----------------------------------|-------------|-------------|
| Battery voltage (V) | 18 | 18 |
| Idle engine speed (RPM) | 0 - 2.500 | 0 - 4.500 |
| Max. machinable screw length (mm) | 55 | 55 |
| Max. torque, wood/steel (Nm) | 7/18 | 5/14 |
| Li-Ion battery capacity (Ah) | 3,1/4 | 3,1/4 |
| Weight with depth stop (kg) | 1,6/1,8 | 1,6/1,8 |

You can find more information on page 204

Work progress thanks to magazine attachment

With the magazine attachment, you have one hand completely free to push plasterboard into position or work on ceilings, for example. The magazine can be dismantled in seconds without tools and cleaned quickly and easily.

Cordless drill CXS TXS

The 10.8 V XS cordless drills in the ergonomic C shape and classic T shape are attractive options with a light weight of only 0.9 kg. As true powerhouses, they allow for quick and easy screwdriving and drilling without forfeiting anything in the way of power or performance.

| Technical data | cxs | TXS |
|---------------------------------------|-------------------|-------------------|
| Battery voltage (V) | 10,8 | 10,8 |
| Idling speed, 1st gear/2nd gear (RPM) | 0 - 430/0 - 1.300 | 0 - 430/0 - 1.300 |
| Max. torque, wood/steel (Nm) | 10/16 | 10/16 |
| Drilling diameter, wood/steel (mm) | 12/8 | 12/8 |
| Torque adjustment 1st/2nd gear (Nm) | 0,3 - 3,4 | 0,3 - 3,4 |
| Li-lon battery capacity (Ah) | 2,6 | 2,6 |
| Weight with Li-Ion battery (kg) | 0,9 | 0,9 |

Extremely versatile

The CENTROTEC quick-change system and the FastFix attachments ensure rapid changing between drilling and screwdriving.

01 Cordless solutions

For absolute reliability when cutting and grinding.

With robustness, resistance to dust and ideal suction power, the angle grinder can facilitate the cutting of even the hardest of materials.

Cordless angle grinder **AGC 18**

The AGC 18 cordless angle grinder is dust-resistant and durable thanks to the enclosed brushless EC-TEC motor and protected electronics.

| Technical data | AGC 18 |
|------------------------------|---------------|
| Battery voltage (V) | 18 |
| Idle engine speed (RPM) | 4.500 - 8.500 |
| Disc dia. (mm) | 125 |
| Spindle thread/flange | M14 |
| Li-ion battery capacity (Ah) | 5,2 |
| Weight with Li-ion (kg) | 2,7 |

Work adapted to the material The continuously adjustable speed of 4500 to 8500 rpm ensures that cutting and grinding is tailored to the material.

Cordless freehand cutting system **DSC-AGC 18 FH**

To safeguard health when working, the dust extraction attachment transports over 95% of the dust directly into the mobile dust extractor – making it ideal for dust-free cutting work on mineral materials in interiors. For ease of use, the Bluetooth® battery pack* starts up the connected mobile dust extractor automatically.

| Technical data | DSC-AGC 18 FH |
|--------------------------------------|---------------|
| Battery voltage (V) | 18 |
| Idle engine speed (RPM) | 4.500 - 8.500 |
| Disc dia. (mm) | 125 |
| Cutting depth (mm) | 27 |
| Dust extraction connection dia. (mm) | 36/27 |
| Spindle thread/flange | M14 |
| Li-ion battery capacity (Ah) | 5,2 |
| Weight with Li-ion (kg) | 3,2 |

Precise, unrestricted cutting

Sophisticated guard provides a clear view of the cutting line – for easy orientation along the scribe mark. The guard can also easily be opened out to the front to allow work close to edges.

You can find more information on page 300

* The versions with Bluetooth® technology are not available in all countries. Please contact your local dealer for further information.

Warranty all-inclusive. Your plus in performance.

Benefit from the comprehensive services provided by our all-inclusive warranty. When you register your new Festool tool, it is covered for the first years of use so you can concentrate on what really matters: your work.*

You can find more information on page 4

* Warranty all-inclusive is valid for all Festool tools registered within 30 days of purchase. The Festool warranty terms and conditions shall apply and are available at www.festool.com/service. The service offer may differ according to country and importer. The offer for "full repair, free of charge" does not apply for damage to consumables and accessories, misuse, damage caused by the use of non-original accessories or spare parts, nor in the case of tools which have been dismantled or subjected to constant, hard-wearing use. Wear parts are excluded.

For more light and full sound.

In addition to the right tools, your daily work also demands a suitable working environment with Festool. Because work is simply easier with perfect lighting and great sound.

Torch SYSLITE UNI SYSLITE KAL II

The handy SYSLITE UNI and KAL II are always ready to light up dark corners. Their powerful, energy-efficient, high-power LEDs and lightweight and compact design make them a welcome working aid. They are compatible with all conventional Festool battery packs.

| Technical data | UNI | KAL II |
|--|-----------|-----------|
| Lumen value 1st/2nd stage (lm) | 30/43 | 310/769 |
| Light source (watt) | 9 | 18 |

HighPower Li-ion battery. Noticeably lighter at full power.

In order to ensure that work is as non-fatiguing as possible, the Li-HighPower Compact battery has a reduced weight, with no detriment to performance. Thanks to the Li-HighPower cell technology, it is powerful enough for any application. With a weight of under 600 grams, it is both 20% lighter and 50% more compact than a 5.2 Ah standard battery pack.

Dust-free working made

With the Bluetooth® battery pack*, the mobile dust extractor is automatically started up when the cordless tool is switched on. All 18 V battery packs are available with Bluetooth® technology* and are already included with delivery for many cordless tools

Exceptional: Full repair, free of charge*.

Benefit from the comprehensive services you register your new Festool tool, it is

* The offer for "full repair, free of charge" does not apply for damage to consumables and accessories, misuse, damage caused by the use of non-original accessories or spare parts, nor in the case of tools which have been dismantled or subjected to constant, hard-wearing use. Wear parts are excluded.

** Warranty all-inclusive is valid for all Festool tools registered within 30 days of purchase. The Festool warranty terms and conditions shall apply and are available at www.festool.com/service. The service offer may differ according to country and importer.

Lightweight. Handy. Unbeatable profile cutting capacity – even with the Li-HighPower Compact battery.

The CARVEX pendulum jigsaws.

Work comfortably in any position with the CARVEX. The machine operates at 3800 strokes per minute for inimitably powerful cutting strokes using an EC-TEC motor and unbeatable profile-cutting capacity. And it can be adapted to any situation you encounter while working. This is guaranteed by the varied range of accessories, including angle table, core maker, guide rail and various base runners.

Cordless pendulum jigsaws CARVEX PSC 420 CARVEX PSBC 420

Our cordless versions: Work ergonomically without a cable – independently of the mains power supply and effortlessly in all application areas thanks to the 18 V battery pack.

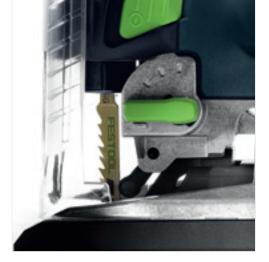

Jigsaws CARVEX PS 420 CARVEX PSB 420

The choice is yours: Guide the CARVEX PS 420 directly at the ergonomic knob handle, while the CARVEX PSB 420 has a handy D-handle. You decide based on your preferences – it makes no difference to the power, comfort or ergonomics of the tool.

Pendulum jigsaws | Sawing and oscillating 02

Changes without using tools

Adapting to the working material is worth it. The results are more accurate and the saw blades last much longer. The Festool system is therefore designed to reduce set-up times, e.g. with single-handed saw blade changes without the need for additional equipment. In addition, benches and base runners can be changed without the need for additional equipment.

Optimum handling and operation

With a weight of only 2.3 kg, a slim, ergonomic design, non-slip soft-grip coating and on/off switches mounted on both sides (also centrally on stirrup handle version) for right-handed and left-handed operation.

Precision cutting along the scribe mark The stroboscopic light brings the saw blade to a visible stop, while dust extraction and the blowing function of the CARVEX keep the view of the scribe mark free.

Extremely versatile

Even the smallest circles (radii of 34 mm to 1.5 m) are easy to manufacture with the core maker and compatible jigsaw blade, e.g. the S 75/4 FSG.

Everything at hand. The accessories SYSTAINER.

Whether you are working with the various outsoles, core makers, angle table/adapter table or replacement splinter guard – with the ZH-SYS-PS accessories Systainer, you will have everything you need to hand to make optimum use of your jigsaws in all of your applications. And this is stored away neatly and compactly in the practical Systainer³.

Our classic – tried and tested for universal use. The TRION pendulum jigsaws.

Thoroughly robust and powerful. The three-way saw blade guide with parallel adjustable carbide jaws guarantees precise cuts at accurate angles. You also save time: The simple yet effective splinter guard for splinter-free cuts and the tool-free FastFix saw blade quick-change system avoid the need for rework.

Powerful and consistently accurate The three-way saw blade guide with parallel adjustable carbide jaws guarantees precise cuts at accurate angles. And, thanks to the simple swivelling function of the table, you can achieve mitre cuts with ease.

Rapid saw blade changes

The FastFix quick-clamping saw blade system saves you time and money without the use of additional tools. Sealing MIM technology (Metal Injection Moulding) and the fibrereinforced quick-clamping lever guarantee lasting reliability.

Splinter-free cuts The simple but effective splinter guard ensures splinter-free cuts and avoids time-consuming finishing work, even on veneered surfaces. Typical Festool: Precise right down to the smallest detail.

Battery and charging technology from page 22

New versatility for perfect cuts.

Whether you require speed for straight cuts or precision in tight curves. In wood, plastic, building materials or metal. With cross-set or sanded teeth, a small or large pitch, made from HCS tool steel or carbide-tipped. No matter what you want to cut, a glance at the application overview of Festool's new range of jigsaw blades, will help you find the correct saw blade right away.

Tips for setting the jigsaw correctly depending on the application.

Speed Control

High speeds in settings 4–6 are ideal for machining soft, temperatureresistant materials such as wood. Low speed settings of 1–3 are recommended for temperature-sensitive plastics such as acrylic glass or PET in order to avoid smearing and for metals and building materials in order to minimise jigsaw blade wear and the production of dust.

Pendulum stroke setting

A higher pendulum stroke makes it faster and easier for the jigsaw to work through the material, but it usually results in significant splintering. A low or deactivated pendulum stroke ensures low-splinter, accurate cuts at a low working speed and is therefore ideal for precise adjustment work and curved cuts.

| B | | |
|---|--|--|

| Material | Saw blade | Application | Speed recommendation | Pendulum stroke recommendation |
|-----------------------|-----------------------|---|-------------------------|--|
| | Basic | For quick cuts in wood where high precision is not required. | 4-6 | _ |
| | Universal | The universal blade for perpendicular cuts fundamentally encompasses all relevant applications involving wood. Also ideal in combination with the Festool guide rail. | 4-6 | |
| WOOD | Straight Cut | For highly precise perpendicular cuts thanks to extremely sharp Japanese teeth – the fibres are firstly scored, then cut through cleanly. | 4-6 | Min. for high precision Max. for high speed |
| | Curves | Ideal for curves – even extremely tight radii are possible. | 4-6 | |
| | Fine Cut | For precisely cut and splinter-free surfaces. | 4-6 | _ |
| | Solid Materials | For the toughest demands such as plastic solid material and fibre- reinforced plastics. | 1-3 | |
| PLASTICS | Profile | For plastic profiles, acrylic glass (e.g. $Plexiglas^{\circledast}$) and soft plastics. | 1-3 | off |
| | Laminate | For laminate and boards bonded with melamine resin (e.g. Trespa®). | 1-3 | _ |
| METAL | Steel/Stainless Steel | For machining aluminium, non-ferrous metals and steel. | 1-3 | - 11 |
| METAL | Sandwich Materials | For sandwich materials. | 1-3 | – off |
| | Abrasive Materials | For gypsum and cement-bonded chipboard and fibreboard. | 1-3 | |
| BUILDING MATERIALS | Ceramics | For machining brickwork and ceramics. | 1-3 | Min. for high precision Max. for high speed |
| | Insulation | For soft insulating materials, cardboard and polystyrene. | 1-3 | _ |

Extremely appropriate 🌘

Appropriate 🔾

For sawing precision. The TS 55, TSC 55 and TS 75 plunge-cut saws.

High-quality working results

The guide rail guarantees clean, splinter-free cuts. The plunge-cut saw is fitted with guidance jaws that do not require tools to be adjusted, in order to enable the saw to operate with complete accuracy.

Systems get it done

The plunge-cut saw system with guide rail and MFT multifunction table allows for a variety of applications both in the workshop and at assembly sites. You can securely place and align your workpieces on the angle stop in order to machine them with precision.

Perfect cut-outs

E.g. plunge cuts in kitchen worktops must be made precisely on the scribe mark. The transparent viewing window also allows a perfect view of the end markings, for example in corners.

Dust-free work

The adjustable intake manifold with CLEANTEC sleeve ensures that the suction hose is securely fitted in the tool. In combination with a Festool mobile dust extractor, the chips are sucked up at their source – providing a clean and healthy working environment.

For fast, precise cross-cutting. The HK 55, HKC 55 and HK 85 portable circular saws.

Quick and precisely angled cuts

Click – and you're ready to go. The circular saws can easily be connected to the FSK cross cutting guide rail. In just a few steps, this produces a portable and easy-to-use compound mitre saw system. This makes it quick and easy for you to cut slats and boards to length.

All-rounders for woodworking

Cutting solid wood to length, joinery work, cutting of boards, square timber or planks – with the Festool circular saws in combination with the cross cutting guide rail, guide rail, parallel side fence or freehand, cuts can be made effortlessly.

More independence

For more mobility in timber construction: The cordless circular saw with FSK cross cutting guide rail demonstrates what saws are capable of achieving on construction sites today – with no need for sockets or cable pulling.

Exceptional: HK 85 including groove router

Turn your HK 85 portable circular saw into a powerful groove router in an instant – with just a few steps and the adjustable groove cutter conversion kit, which is available separately. Ideal for longitudinal and transverse grooves, rafters and inserted ceilings.

Maximum precision in sawing work – even with a battery.

The plunge-cut saws with 55 mm cutting depth.

The plunge-cut saws in combination with the guide rail allow for precise and exact cuts with no need for time-consuming follow-up work. Can be fitted with a viewing window or splinter guard, for even more control and perfect results. Or the expanded angle adjustment and dual display for cutting depth adjustment as a guarantee for even more precision and simple operation.

Splinter-free sawing on both sides

With the clip-on splinter guard in combination with the guide rail it is even possible to saw on both sides without splinters. Advantage: No rework and considerably less workpiece waste.

More safety, more comfort

The spring-loaded guide wedge runs in front of the saw blade to prevent it from jamming and makes it easier to insert the blade in existing joints.

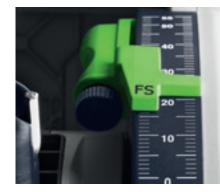

Exact depth setting

Easy to read and adjust: The dual cutting depth scale for working with or without a guide rail. With extra-large font and fine adjustment feature to perform accurate plunge cuts.

Quick, one-handed and with no need for tools. Saves time and improves quality, because working with a material-specific saw blade goes without saying.

Convenient extraction. With Bluetooth®.

The battery pack communicates via Bluetooth[®] with the Bluetooth[®] module of the CLEANTEC mobile dust extractor (can be retrofitted as an accessory for CT 26/36/48, or directly integrated for CT MINI I and MIDI I) and automatically starts the mobile dust extractor when switching on the TSC 55.

The versions with Bluetooth® technology are not available in all countries. Please contact your local dealer for further information.

You can find more information on Bluetooth® Autostart on page 23

Large saw with depth.

The plunge-cut saw with 75 mm cutting depth.

Follows only one line. Accurate to the millimetre and without splinters. With the necessary force for each material – lightweight and easy to handle. The motor, with three bearings includes MMC electronics for an exceptional service life. The TS 75 combines considerable power in a compact device.

Plunge-cut saw **TS 75**

Precise plunge cuts in materials up to 75 mm thick.

Optimum cutting quality

For high-quality working results: The guide rail guarantees clean, splinter-free cuts. The TS 75 is fitted with guide jaws that do not require tools to be adjusted, in order to enable the saw to operate without any inaccuracy.

Safe and clean insertion

The spacer wedge is spring loaded and slides back into the housing automatically when placed on the workpiece. Once the machine is inserted, the spacer wedge moves into the saw groove and prevents the saw blade from getting jammed. This means that the spacer wedge is always on the saw, ensuring safety at all times.

Even better cutting performance. **Using systems.**

As individual tools, they are already an attractive option; as a combined system, they are certain to amaze and impress. Whether with a guide rail, combination bevel, parallel side fence, multifunction table or effortless connection to a dust extractor, everything is compatible and optimises your work.

You can find more information on page 328

Versatility for wooden structures – even with a battery.

The portable circular saws with 55 mm cutting depth.

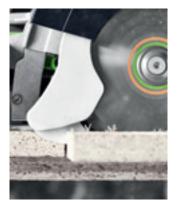

The compound mitre saw system for more independence combines precision and efficiency with a high level of user-friendliness, optimised ergonomics and ease of use. Features such as the cutting-depth adjustment with plunge cut function, hinged-cover remote control, guide wedge and FastFix saw blade change, for example, provide the best possible working conditions. And the FSK cross cutting guide rail produces precise cuts with repeat accuracy.

Reproducible

Make cross cuts at accurate angles quickly anywhere with the FSK cross cutting guide rail.

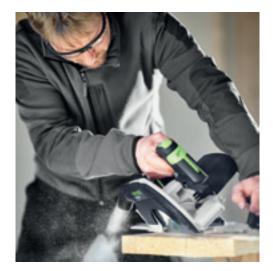

Guide wedge for a high level of safety

The guide wedge enables unobstructed, stress-free and therefore safe sawing. As it is integrated into the spring-mounted pendulum hood, it is also possible to carry out plunge cuts in a safe and unobstructed way.

Pendulum hood remote control

To enable a clear view of the saw blade, the pendulum guard can be moved backwards from the front handle. This uncovers the saw blade and ensures your hands always remain at a safe distance from the saw blade.

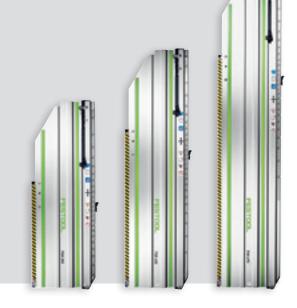

Scribe mark = cut

Precision work, even for mitre cuts of up to 50°. When sawing in combination with the guide or cross cutting guide rail, the scribe line will always follow the cutting edge exactly, even when mitre cutting.

Reproducible. The FSK cross cutting guide rail.

Coupling the HK 55, HKC 55 and HK 85 with the FSK cross cutting guide rail, which is available in three lengths, is incredibly easy. In no time at all, you have a mobile, easy-to-handle compound mitre saw system for quick and accurately angled crosscuts.

You can find more information on page 51

The timber construction all-rounder. The portable circular saw with 85 mm cutting depth.

Whether you are cutting solid timber, performing joining work, cutting planks, square timber or boards, sawing tenons or cutting panel materials of all types – the robust 1900-watt HK 85 ideally combines performance and ease of use with numerous equipment options and unique accessories. Cutting-depth adjustment with plunge-cut function, hinged-cover remote control and guide wedge make the tool safe and convenient to use.

Portable circular saw **HK 85**

Powerful portable circular saw with a cutting depth of 85 mm.

From portable circular saw to groove router

With the adjustable groove cutter conversion kit, the versatile HK 85 becomes a groove router for transverse and longitudinal grooves, making it a real allrounder. For grooves with a width of 16 mm to 25 mm and a depth of up to 35 mm.

Scribe mark = cut

Precision work, even for mitre cuts of up to 60°. When sawing in combination with the guide or cross cutting guide rail, the scribe line will always follow the cutting edge exactly, even when mitre cutting.

The FS guide rail. Safe and dead-straight machine guidance.

Connect comfortably Two guide rails can be conveniently connected and aligned using the connecting piece.

No splinters The rubber lip right at the scribe mark works as a splinter guard and prevents the edges from splintering even with angled cuts.

No slipping

The adhesive coating ensures that the rail remains stable. Different fixing options such as clamps and FS-Rapid quick-action clamps are available for a more secure grip.

The FSK cross cutting guide rail. Fast, guided cross cuts at accurate angles.

Stop system The fixed positioning bolt and the adjustable stop allow angled cuts from -60° to +60° to be made and repeated exactly. For simple work, the most common angle settings are locked into place in the rail.

Quick-acting closure

The circular saws can be connected to or disconnected from the cross cutting guide rail in an instant depending on whether you are sawing with guidance or freely by hand.

Retraction function

To ensure that it is always ready for use, the cross cutting guide rail has an adjustable stop and an integrated rubber spring that brings the saws back to their starting position.

Three machines in one. The portable circular saw for carpentry.

The HK 132 is a versatile all-round tool. It impresses as a first-class circular saw with a cutting depth of 132 mm, and as first-class notch cutter or reliable flattening planer. When used together with the conversion kits, it is possible to switch from one function to another in next to no time. Together with the special sandwich saw blade, it is also suitable as a construction site saw for sawing sandwich panels.

Double the precision. The KAPEX sliding compound mitre saws.

Two sliding compound mitre saws – one shared aim: The perfect cut. Compact, lightweight, unbeatable comfort and indescribable versatility. For precision results in workshop or assembly applications. With spherical bushings on both sides to offer a double layer of protection in terms of keeping the carriage precisely on course across extra-large columns.

Sliding compound mitre saw **KAPEX KS 120**

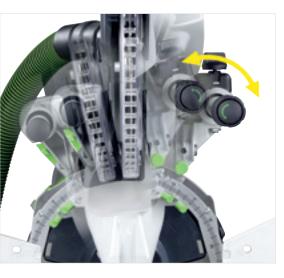

With dual line laser for precise marking, easily accessible precision adjustment to enable the saw blade angle to be set with millimetre accuracy and integrated extra mitre position for cutting depths up to a maximum of 120 mm.

Sliding compound mitre saw **KAPEX KS 88**

88 mm cutting capacity with a compact, lightweight design.

Sliding compound mitre saws | Sawing and oscillating 02

Even greater comfort

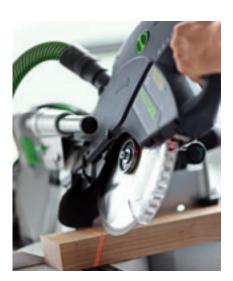

The KS 120 features precision adjustment for setting the saw angle accurate to the millimetre. As with all important control elements, quick and convenient adjustment from the front of the machine.

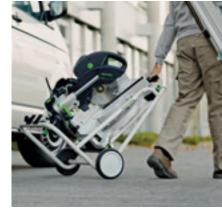

> **Quality down to the finest detail** The KS 120 boasts a dual-line laser for accurately marking the saw cut.

Extra large dimensions with dual ball bearings

The Festool twin-column guide guarantees reliable, smooth guidance of the saw blade and represents maximum precision.

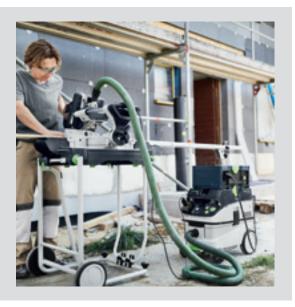

Static and transport frame in one The base frame turns the KAPEX into a mobile unit that can be converted into a sawing station in three hand movements. With a trimming length of 2.40 m (including trimming attachment).

The portable electrical outlet module. **The SYS-PowerStation.**

Every construction site operation can be safely planned from now on. The availability of power is no longer an element of uncertainty- as a high-performance battery storage solution, the SYS-PowerStation supplies power. Even where there would otherwise be none.

This product is not available in all countries. Please contact your local dealer.

You can find more information on page 324

Mobility, versatility and best results – perfectly combined.

The KAPEX compact sliding compound mitre saw.

Dispenses with everything not needed for the job, such as any unnecessary weight. This device makes no compromises in terms of precision and versatility – with a mitre angle on both sides of up to 60 degrees and an inclination angle on both sides of up to 46 or 47 degrees. And a range of other clever details such as the LED spotlight, the pull-out extension table, the additional groove function and the bevel.

Unlimited mobility With ergonomic carrying handles, cord holder and a transport safety device, in addition to an extremely compact, lightweight design thanks to flushmounted guide rods.

Optimum visibility of the scribe mark The LED spotlight (included in all SET versions) projects the shadow of the saw blade onto the material, highlighting precise cutting lines.

More mobile with the base frame

The underframe for the KS 60 is a stand and a transport frame in one – for even easier transportation of the KAPEX KS 60. It takes the KAPEX KS 60 up to a working height that is easier on the back and can be set up quickly and easily using a cleverly designed folding mechanism. The additional trimming attachment enables precise working with the extension arm up to a cutting length of 2.4 m.

| | Saw blades from page 70 | |

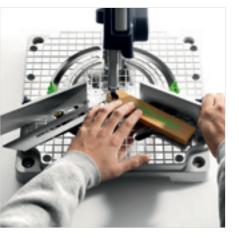

Trimming strips could not be easier. The SYMMETRIC compound mitre saw.

Precision has never been simpler: Measure the angle, transfer it, always saw along the bisecting line without having to perform any calculations, and you're done. The SYMMETRIC SYM 70 lets you work considerably faster thanks to the symmetrical stop system. Making exterior angles up to 60° and interior angles up to 68° is easy.

Compound mitre saw **SYMMETRIC SYM 70**

| Technical data | SYM 70 |
|--------------------------------------|---------------|
| Power consumption (watt) | 1.150 |
| Idle engine speed (RPM) | 2.700 - 5.200 |
| Saw blade diameter (mm) | 216 |
| Interior angle (°) | 0 - 68 |
| Exterior angle (°) | 0 - 60 |
| Max. strip height (mm) | 70 |
| Max. strip width (mm) | 80 |
| Dust extraction connection dia. (mm) | 27/36 |
| Weight (kg) | 9,6 |

Sawing without the need for calculations

It really doesn't get much simpler – use the bevel to measure the angle from the wall or recess, transfer it over to the stop system and make the cut.

A firm grip

The stop jaws on the SYMMETRIC can be locked to prevent the set angle from changing while you work. Whether interior angles up to 68° or exterior angles up to 60°, everything stays in the right position.

Clever accessories

The additional feet raise the workbench of the SYM 70 to the exact height of a Systainer³ M 112 or SYS 1 T-LOC. It can then be used as a workbench to support long workpieces safely and securely.

Your fingers – invaluable!

The TKS 80 bench-mounted circular saws with SawStop technology.

Sawing is part and parcel of your everyday work. You place great emphasis on adhering to the highest levels of precision and producing the best cutting results. Even when it comes to larger workpieces, flawless quality is always on your mind. To help you meet these high standards, we have developed the perfect tool – the new TKS 80 bench-mounted circular saw. Its most important feature? Thanks to the intelligent SawStop technology, you no longer have to worry about your fingers. Your fingers are your most important tools, and we will ensure they are protected from cuts and injuries while you concentrate on your work.

5000 casualties per year 20 injuries per workday 30% serious injuries*

SawStop technology

Reduces the risk of serious cutting injuries.

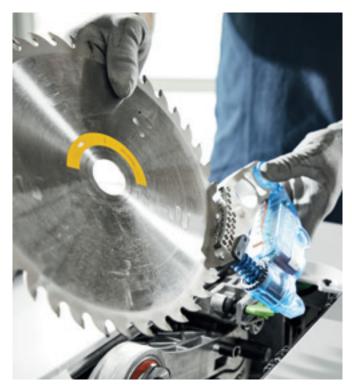

Top-quality products and protecting users' health are two important driving factors behind Festools' product development. Working with these criteria in mind, we inspect all innovations and assess the use of new technologies in order to make your daily work easier, safer and more efficient. We want our users to know that they can rely on Festool tools now and in the future, which is why our engineers are already working on innovative technology for the tools you will use in years to come.

The BG BAU awards the EuroTest prize for outstanding achievements in occupational health and safety to Festool again in 2019.

Online

Web special for SawStop technology: www.festool.com/sawstop

Added safety

The core component of the technology is a cartridge that drives an aluminium block into the saw blade at 500 N with the aid of a spring if it comes into contact with human skin during operation. The saw blade stops within five milliseconds and disappears from the hazardous area into the machine table. This prevents serious injuries from cuts.

Sophisticated

The intelligent electronics in the SawStop control system continuously monitor the operating condition of the complete system: Is the key inserted? Is a cartridge pretensioned? And is the saw blade also installed correctly? Is the distance between the aluminium block and saw blade correct?

Bypass option

SawStop technology can, if necessary, be deactivated. This means that even conductive materials can be machined using the saw.

Flexible cutting height Flexible cutting height up to 80 mm for larger cross cuts.

Maximum precision

Fewer splinters on the upper surface of the material in mitre rip cuts by swivelling the saw blade to the left. More space for your hands and a clear view of the workpiece.

Healthier working with a system Dust extraction attachment with CLEANTEC extraction

sleeve ensures dust-

free work and a free view of the workpiece.

Saw blades from page 70

Versatility made easy. The PRECISIO trimming saws.

Cross or rip cuts. Mobile or stationary. Interior fitting, furniture-making or exhibition stand fitting. Diverse tasks, one solution: The PRECISIO CS 50 and CS 70 – lightweight and sophisticated functions.

Fast changeover from cross to rip cuts The angle stop can be rotated by 180° and can be used easily on either side. The CS 50 can therefore be changed from the cross-cut to the rip-cut position in no time at all.

One handle for all functions

On/off switch, speed adjustment, quick start/stop functions and guiding mechanism – all of the most important control elements are integrated and clearly arranged in the multifunctional handle on the CS 50.

Mobile or stationary

Comprehensive system accessories allow you to upgrade the CS 70 to a complete sawing station with minimal effort, enabling you to make cross cuts on materials that exceed standard dimensions.

| | Support AF for CS 50, CMS-GE, support for both side use, supports workpieces while cutting, enlarges the support surface by 300 mm, dimensions length x width 662 x 390 mm, in carton | 492242 |
| | Extension table VB-CMS/CS 50 for CS 50, CMS-GE, dummy plate, foldaway legs, dimensions length x width 664 x 480 mm, in carton | 495531 |
| - | Stopper LA-CS 50/CMS for CS 50, CMS-GE, with fine adjustment and rear clamp, can be operated from front, with moveable stop profile for precise and safe longitudinal cuts, in carton | 574796 |
| 2. | Sliding table ST for CS 50, CMS-GE, for MFT 3-VL, max. working width for trimming cuts 830 mm, in carton | 492100 |
| | Splinter guard CS 50 SP/10 for CS 50, for splinter-free cut edges on both sides, qty. in pack 10 Units, in self-service display pack | 492241 |
| n d | Foldaway legs CS 50 KB for CS 50, makes two work heights possible, foldaway legs for the extension of the CS 50 FLR version, in carton | 575671 |
| 00 | Saw blade holder SGA for CS 50, CMS-GE, for safe and space-saving storage of up to 4 saw blades (max. Ø 190 mm) and up to 3 splinterguards (not included in contents), in carton | 492228 |

| Accessories fo | r trimming saw CS 70 | Order no. |
|----------------|--|-----------|
| / | Extension table CS 70 VL for CS 70, simple fitting, folds away, for safe support of long workpieces when sawing to width, extends the support area by 580 mm, dimensions length x width 525 x 522 mm, in carton | 488061 |
| _ | Extension table CS 70 VB for CS 70, with adjustable dimension scale, easy and quick to assemble and dismantle, for safe and precise width sawing, extends the support area by 411 mm, max. working width longitudinal 680 mm, dimensions length x width 773 x 435 mm, in carton | 488060 |
| | Trimming attachment CS 70 KA for CS 70 and CS 50, removable, with support, bearing surface, tape measure and adjustable stop, simple extraction and rolling out of measuring tape thanks to telescopic mechanism, length 1.200 – 2.050 mm, in carton | 488063 |
| | Stopper CS 70 LA for CS 70, MFT/3-VL, with fine adjustment and rear clamp, can be operated from front, with moveable stop profile for precise and safe longitudinal cuts, in carton | 488062 |
| 200 | Sliding table All variants: for CS 70, easy and quick to assemble and dismantle, in carton | |
| - वग | CS 70 ST for sawing boards, 2 x supporting legs, stop ruler with additional clamp, max. working width for trimming cuts 920 mm | 488059 |
| ~N | CS 70 ST 650 max. working width for trimming cuts 650 mm | 490312 |
| طووك | Transport rollers CS 70 TR for CS 70, can be fitted to foldaway legs, for simple and comfortable transportation, in carton | 488064 |
| | Splinter guard CS 70 SP /10 for CS 70, for splinter-free cut edges on both sides, qty. in pack 10 Units, in self-service display pack | 490340 |
| Q | Dust extraction set CS 70 AB for CT/CTM, comprising: dust extraction hose D27x2.0 m, dust extraction hose D36x1.0 m, Y terminal, can be used with Basis, CS 70, CS 50 and CMS, dust extraction with MINI/MIDI only possible in combination with AD-D 36/CS50/CS70/CMS (499196) adapter hose, diameter 27/36 mm, in carton | 488292 |

| Other accessories | | Order no. |
|-------------------|--|-----------|
| | Adjustable stop KA-AR for KA-KS 120-L trimming attachment and KA-KS 120-R trimming attachment, for CS 50, CS 70, for positioning workpieces on trimming attachment CS 70 KA, Basis KA 100/200 and KA-KS L/R, in self-service display pack | 488560 |
| - | Angle stop WA for CS 70, CS 50, CMS-GE, for work requiring 2 stops, in carton | 574797 |
| | Adjustable stop WA-AR for CS 50, CS 70, to stop workpieces on trimming attachment CS 70 WA, CS 50 WA and Basis WRA 500, in self-service display pack | 491712 |
| | Roller stand RB for all semi-stationary devices (CS/KS/CMS), may be used with the CS 50, CS 70, CB 120, Basis Plus System, CMS-GE, multifunction table, to use longer workpieces for longitudinal sections and cross sections and cutting and grinding work, height adjustable 630 – 1.000 mm, in carton | 488711 |

Saw blades from page 70

Quality cuts better.

Durability and precision under the toughest conditions. Adapted to the application and material. Made from high quality steel with saw teeth made from fine grain carbide. After all, you can only achieve a perfect cut when the saw blade is as good as the machine.

Colour code

Wood/Soft plastics For hardwood, softwood, solid wood and building panels.

Plastics/Mineral materials Fine-grain carbide guarantees perfect cuts in coated panels and mineral materials.

Aluminium For aluminium profiles and panels.

Steel/Sandwich panels The slightly chamfered teeth are suitable for sawing cable ducts or steel sheets and profiles.

Building materials The material and teeth

HW

are designed specifically for working with abrasive materials.

Perfect adaptation

The saw blades are made of high-quality metal for perfect cuts and a long service life. Cutting angle and tooth shapes are adapted to the application and machine.

Long-term precision

A long service life and perfect cutting results come guaranteed thanks to the slow sanding action using diamond discs. Achieve flawless results without the need for major rework.

Simple selection

The practical colour coding system helps you quickly locate the correct saw blade for the specific application.

Minimum heat generation

Slow heating of the circular saw blades through laser-cut and thermally adjusted blade cores.

Rapid cutting progress

High-quality steel and optimised expansion slot for smooth, safe cutting progress.

Robust quality

Long useful life and excellent sharpening properties of saw teeth guarantee an excellent price/performance ratio.

Tooth shapes

Alternate top bevel saw blade (W/PW)

The teeth on this blade slope to the left and right and cut alternately. The alternate top bevel saw blade is a universal blade for all types of wood.

Flat trapezoidal tooth saw blade (TF)

With alternating trapezoidal and flat teeth, this blade is used for cutting aluminium, hard plastic and materials with hard coatings.

Flat tooth saw blade (F)

The edges of the teeth are straight, not slanted. Each tooth cuts in the same way. This tooth shape is used in saws for cutting steel and construction materials.

Innovative and multi-talented.

The sword saws.

Whether it is wood or insulating materials, the UNIVERS SSU 200 sword saw cuts all common materials in wooden structures. The IS 330 is the specialist for cutting insulating materials. It combines the advantages of a chainsaw and a portable circular saw in a unique mobile system. The guide rail ensures straight, splinter-free trimming, longitudinal, mitre and compound cutting with ease.

Sword saw UNIVERS SSU 200

Wood and insulating materials up to 200 mm thick.

| Technical data | SSU 200 | IS 330 |
|-----------------------------------|-------------|-------------|
| Power consumption (watt) | 1.600 | 1.600 |
| Idle engine speed (RPM) | 4.600 | 4.600 |
| Ctting depth 0°, 90°/45°/60° (mm) | 200/140/100 | 330/230/165 |
| Mitre cuts (°) | 0 - 60 | 0 - 60 |
| Cutting speed (idling) (m/s) | 10,6 | 12 |
| Blade position (°) | 0 – 10 | 0 – 10 |
| Weight (kg) | 6,5 | 7 |

Sword saw IS 330

Pressure-resistant insulating materials up to 330 mm thick.*

Tool-free chain changeover

Thanks to FastFix, the chain can be changed with just a few hand movements. The chain can also be tensioned without tools by turning the clamping wheel.

Work adapted to the material

The SSU 200 is equipped with MMC electronics: Material- and chainsaw-chain-specific speed control, smooth start-up, overload protection and quickacting safety brake guarantee perfect results in all applications and are gentle on both the machine and the material.

The revolution in insulating-material saws. The cordless insulating-material saw.

No matter whether freehand or guided with guide rail and stop system, whether working on roofing, scaffolding or flooring, with insulating material made of mineral fibres, natural fibres or PUR insulating boards – the ISC 240 impresses with its mobility, versatility and efficiency. With powerful 18 V Li-ion battery and brushless EC-TEC motor for cutting insulating materials at a cutting depth of up to 350 mm quickly and when on the go.

You can find more information on Bluetooth® Autostart on page 23

| Items included | | Order no. |
|----------------|---|-----------|
| ISC 240 | All variants: SG-240/W-ISC serrated cutting set, adapter table (204160), guide rail slide | |
| 20 | ISC 240 EB-Basic without battery pack, without charger, in Systainer SYS3 M 237 | 576571 |
| | ISC 240 HPC 4,0 EBI-Plus 2 x BP 18 Li 4.0 HPC-ASI battery pack*, rapid charger TCL 6, in Systainer SYS3 M 237 | 576569 |
| 4 | ISC 240 HPC 4,0 EBI-Plus-XL-FS 2 x BP 18 Li 4.0 HPC-ASI battery pack*, rapid charger TCL 6, Systainer SYS3 M 237, angle stop, guide rail FS 1400/2, in carton | 576572 |

Versatile

For flexible insulating materials such as mineral wool and natural fibres with serrated cutting set, for insulating materials such as PUR and styrofoam with cross-set cutting set. In two lengths (240 mm/350 mm) for different material thicknesses.

Insulating-material saw | Sawing and oscillating 02

Clean cutting surface

With the guide rail and angle stop (available in a set or as accessories), repeat cuts can be made perfectly straight and with precise angles.

Quick and durable

The cutting sets with special saw blades allow you to make rapid progress on your work with an extra-long service life, even with insulating materials up to 350 mm. Thanks to the quick-change system, the cutting set is replaced easily and without the need for tools in next to no time.

Greater precision at maximum performance. The VECTURO cordless oscillator.

The sophisticated positioning and dust extraction accessories make the VECTURO OSC 18 an intelligent system solution for the highest demands in performance, comfort and precision for dust-free sawing, scraping and cutting.

Cordless oscillator VECTURO OSC 18

With vibration and noise damping for optimum working comfort and brushless EC-TEC motor with variable speed control to allow work to progress as quickly as possible.

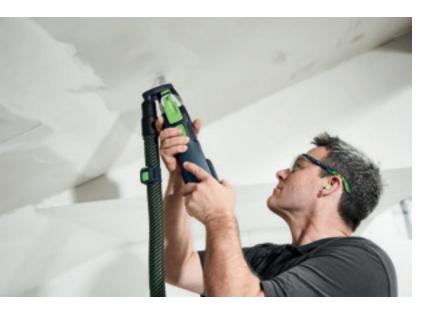

| Technical data | 0SC 18 |
|---------------------------------|-----------------|
| Battery voltage (V) | 18 |
| Oscillation (RPM) | 10.000 - 19.500 |
| Oscillation angle | 2 x 2° |
| Tool holder | StarlockMax |
| Li-Ion battery capacity (Ah) | 4 |
| Weight with Li-lon battery (kg) | 1,8 |

Vibration and emissions values can be found in the operating manual at www.festool.com/vibration

Quick-change system with StarlockMax tool holder Set-up times are short since saw blades and accessories can be changed without the need for additional equipment. Maximum transmission of power to the saw blade.

Dust extraction device

For sawing with minimal dust and having a clear view of the workpiece. Ideal for sawing above head height.

Rotary sanders

Sanding motions and strokes

Depending on the surface quality and desired result, different sanding motions can be selected for coarse or fine sanding. It is also true that the longer the sanding stroke, the more material is removed. A short sanding stroke of three millimetres, for example, is ideal for fine sanding; sanding strokes of five to seven millimetres remove a large amount of material for coarse sanding.

ROTEX – multifunctional legend. The ROTEX geared eccentric sanders.

The unsurpassed original with 3-in-1 principle: With just a single tool for an extremely high material removal capacity in coarse sanding, a super-fine surface in fine sanding and a perfect finish in polishing. When combined with the GRANAT abrasive, the ROTEX saves money thanks to the minimal use of abrasives.

Geared eccentric sanders **ROTEX RO 90**

Compact sander with 90 mm sanding pad diameter and unique 4-in-1 principle thanks to the delta sanding pad.

Geared eccentric sanders **ROTEX RO 125**

Hand-held sander with 125 mm sanding pad diameter.

Geared eccentric sanders **ROTEX RO 150**

Powerful sander with 150 mm sanding pad diameter and patented MULTI-JETSTREAM 2 principle.

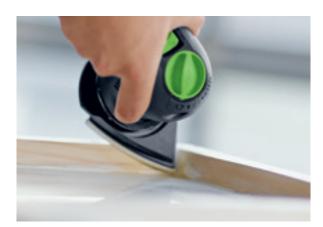

Geared eccentric sander | Sanding and brushing 03

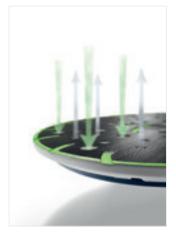

Protects the sanding pad and workpiece Sand safely against abutting edges without the risk of kickbacks with the Festool PROTECTOR.

Corners

A world first: The StickFix sanding pad transforms the ROTEX RO 90 into a triangle sander. Maximum material removal capacity on small surfaces with angles, corners and edges.

Healthy and dust-free thanks to the MULTI-JETSTREAM 2 principle

The MULTI-JETSTREAM 2 principle is defined by the unique interaction between intake air and exhaust air – with optimum dust extraction right up to the edge. An air flow is created which actively transports the sanding dust to the nearest extraction channel. The result: Virtually 100% dust extraction for a consistently high material removal rate, top surface quality and a healthy working environment.

Changing pads without using tools

Simple, fast and safe. FastFix interface for changing sanding and polishing pads quickly without using tools. This means that you can respond to changing tasks and material requirements.

Continuous sanding. Without the need to find a power supply or the hassle of pulling cables!

The SYS-PowerStation allows users to be independent of traditional power sources, such as electrical outlet modules, generators or site distribution boards – to guarantee predictable everyday work.

Compact and mobile, it stores 1500 watt-hours of energy – for most applications, that is sufficient for a whole working day. This product is not available in all countries. Please contact your local dealer.

The right abrasive. **For every application.**

And to ensure that you have a good overview of all your abrasives, Festool has the right Systainer for this. With inserts for the respective abrasive diameter.

The Systainers and other clever accessories can be found from page 92

The compact one-handed sanders – even with a battery.

The eccentric sanders.

Thanks to their low weight and their compact design, the eccentric sanders make it possible to perform sanding work above head height or on vertical surfaces for a long period without tiring. Whether powered by a battery or the mains power supply, both versions are especially powerful and boast a high material removal capacity. And you achieve the result you need quickly and gently thanks to the attachable protector and long-life chip collection bag.

Cordless eccentric sander **ETSC 125**

The cordless version for limitless mobility. And also with an unlimited operating time thanks to the optional mains adapter.

Eccentric sander **ETS 125 R**

The extra-lightweight cable variant.

Brushless EC-TEC motor

With a particularly high material removal capacity

At 250 watts, the power of the ETS makes it stand out in its class and ensures rapid work progress.

Work without interruptions Thanks to the Bluetooth® battery packs with 3.1 Ah capacity and a longer running time than charge time.

Powerful and durable

The powerful 18 V Bluetooth® Ergo battery pack in combination with the brushless EC-TEC motor ensures constant sanding and power similar to that of a mainspowered tool.

Unique: With battery or cable

For all applications which require an even longer operating performance, the 18 V Bluetooth[®] Ergo battery pack* can be replaced with the plug itmains adapter (included in the set and available as an accessory). This alone creates a mains powered machine with an unlimited running time in combination with the plug it-cable – ideal in conjunction with a Festool mobile dust extractor.

* The versions with Bluetooth® technology are not available in all countries. Please contact your local dealer for further information.

Simple edge sanding. With edge sanders ES-ETS 125 and ES-ETSC 125.

Every edge is different. Sometimes it is sawn or routed, sometimes it is coarse or painted. And you want to make all of them perfect. With the innovative solution by Festool, the edge sander, you can do this quickly and easily – from the first application.

You can find more information on page 102

Perfectly built for manual operation. The eccentric sanders with EC-TEC motor.

For reduced fatigue when carrying out overhead sanding work, a good feeling on edges and comfort when working in any position. The ETS EC compact class with ideal ergonomics provides different handle options that remain optimum at all times. The brushless EC-TEC motor and extremely high-quality components guarantee a long service life.

Great results, without fail

Protects not just the workpiece but also the operator. The sanding pad brake, which is tipped with robust carbide, permanently prevents the sanding pad from revolving too quickly when it is in a no-load state and enables the tool to be applied to a surface without producing scratches and to be set down quickly.

The difference between feeling and sensing

The "Vibration Control System" teaches the motor to think. Active regulation of the speed automatically reduces the operating performance when vibrations are too high. The result is smoother operation and a greatly improved feel when sanding with noticeably fewer vibrations.

Improves your sanding experience because nothing drags

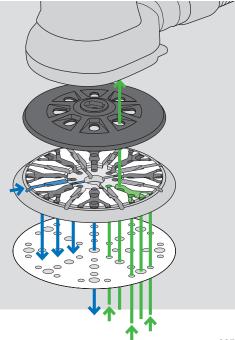

Redeveloped to provide optimum protection for your surfaces and significantly improved handling. The protective sleeve encasing the suction hose is made from 100% nylon, allowing it to glide gently over surfaces and edges. The integrated plug it-cable is also protected against damage.

Switched on and off by the operator – not by chance The perfectly positioned push-button prevents the device from being switched on or off accidentally.

MULTI-JETSTREAM 2. Sanding with built-in dust conveying system.

The MULTI-JETSTREAM 2 principle is defined by the unique interaction between intake air and exhaust air – with optimum dust extraction right up to the edge. An air flow is created which actively transports the sanding dust to the nearest extraction channel. The result: Virtually 100% dust extraction for a consistently high material removal rate, top surface quality and a healthy working environment.

Speedy finishing. The powerful eccentric sanders.

Extremely quiet, perfect ergonomics, continuous speed adjustment, reliable sanding pad brake: Common features of these two eccentric sanders – for more comfort when working for prolonged periods.

Festool know-how. **Just a click away.**

We provide you with comprehensive information online so you can achieve the best possible results with your Festool tools. Expert knowledge, by professionals for professionals.

Clean and dust-free. With chip collection bag or dust extraction.

Whether it is extracted via the reusable long-life chip collection bag or the Festool mobile dust extractor: With our system, you can stave off dust directly where it accrues. And, thanks to the Bluetooth® battery pack*, you can control the mobile dust extractor directly with the cordless sander. * The versions with Bluetooth® technology are not available in all countries. Please contact your local dealer for further information.

For more information about our mobile dust extractors, see page 154

Every edge. Simple sanding. The edge sanders.

How many hours have you spent toiling with a sanding block? How many edges have you already sanded through? Every edge is different. Sometimes it is sawn or routed, sometimes it is coarse or painted. And you want to make all of them perfect. With the innovative solution by Festool, the edge sander, you can do this quickly and easily – from the first application.

Complete cordless mobility without hoses or cables – particularly advantageous for large workpieces.

Edge sander ES-ETS 125

NEW

An edge sander for every edge: Whether sawn or routed, untreated or painted.

Vibration and emissions values can be found in the operating manual at www.festool.com/vibration

Edge sanders | Sanding and brushing 03

Adjustable sanding mode

In Hard mode (setting for pre-sanding), the edge is sanded according to the set angle. In Soft mode (setting for intermediate sanding), the edge sander adapts precisely to the surface to be sanded – this means that neither paint nor filler is sanded through.

Workpiece protection

It is easy and quick to replace the slideway lining on the crossheaded guide to match the surface. Velour linings for delicate surfaces, plastic lining for all other surfaces.

Angle adjustment

The angle adjustment, which does not require tools, can also be used to copy and lock free angles. The integrated angle display guarantees precision when setting angles manually.

from page 136

The compact one-handed RUTSCHER orbital sanders – even with a battery.

Our ergonomic RUTSCHER orbital sanders.

Ideal for sanding narrow or straight surfaces close to edges. Their compact design, low weight and perfect ergonomics make the RUTSCHER orbital sanders ideal for sanding above head height for prolonged periods without tiring.

RUTSCHER cordless orbital sander **RTSC 400**

Compact RUTSCHER cordless orbital sander for power similar to that of a mains-powered tool. Can also be used as a mains-powered sander with plug-it mains adapter.

Where speed and surface meet The MMC electronics ensure that no-load speed is equal to operating speed.

With a particularly high material removal capacity At 250 watts, the power of the RTS makes it stand

out in its class and ensures rapid work progress.

Unique: With battery or cable

For all applications which require an even longer operating performance, the 18 V Bluetooth® Ergo battery pack* can be replaced with the plug it-mains adapter (included in the set and available as an accessory). This alone creates a mains powered machine with an unlimited running time in combination with the plug it-cable – ideal in conjunction with a Festool mobile dust extractor.

Work without interruptions Thanks to the Bluetooth® battery packs* with 3.1 Ah capacity and a longer running time than charge time.

* The versions with Bluetooth® technology are not available in all countries. Please contact your local dealer for further information.

Exceptional: Warranty all-inclusive. **Your plus in performance.**

Benefit from the comprehensive services provided by our all-inclusive warranty. When you register your new Festool tool, it is covered for the first years of use so you can concentrate on what really matters: your work.**

You can find more information on page 4

The original from Festool. The versatile RUTSCHER orbital sander range.

Invented in 1951 and consistently developed in terms of performance, ergonomic detail, efficiency and versatility. The RUTSCHER orbital sanders are perfect for sanding close to edges on three sides, achieving the best results on both small and large surfaces.

The compact corner sanders – even with a battery. The delta sanders.

Sanding near edges and in corners – the delta sanders with iron-shaped pad can be guided accurately along narrow edges and into corners. And their compact design, low weight and perfect ergonomics make them ideal for sanding above head height for prolonged periods without tiring.

| Weight (kg) | 1,2 | _ |
| Weight with Li-ion (kg) | - | 1,4 |

Vibration and emissions values can be found in the operating manual at www.festool.com/vibration

Unique: With battery or cable

For all applications which require an even longer operating performance, the 18 V Bluetooth® Ergo battery pack* can be replaced with the plug it-mains adapter (included in the set and available as an accessory). This alone creates a mains powered machine with an unlimited running time in combination with the plug it-cable - ideal in conjunction with a Festool mobile dust extractor.

For rebates, curves and profiles. The DUPLEX linear sander.

The linear sanding movement of the LS 130 makes sanding by hand extremely comfortable and produces the perfect result considerably faster and with far less effort. The applications covered by the LS 130 include the most diverse profile, edge and window finishing. Particularly clever: The DIY construction kit for creating individual sanding pads for any profile.

Belt sander | Sanding and brushing 03

Gentle positioning

Thanks to the sanding frame, the belt sander can be positioned gently and securely, does not tilt and is easy to guide.

Stationary use

With the bench unit, you can turn a mobile belt sander into a stationary unit in an instant, allowing you to machine smaller workpieces more efficiently.

For perfect drywalling results. The long-reach sanders.

With the Festool long-reach sanders, any room in drywall construction is easy to prepare. Their simple handling enables perfect sanding and, in combination with Festool extractors, they help to make work healthier. The PLANEX LHS 2 225 additionally features an LED light and eccentric movement for especially high surface quality – as well as making work less tiring thanks to extraction.

Long-reach sander PLANEX LHS 2 225

The circumferential LED ring light reveals any unevenness on the surface during sanding itself – no need for time-consuming rework.

Long-reach sander PLANEX easy LHS-E 225

Unpack and go. Particularly simple to use without assembly or adjustment.

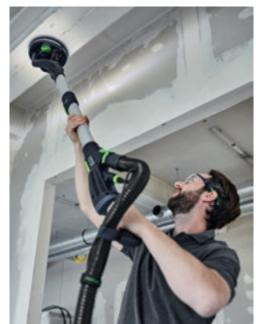

Brushless EC-TEC motor

The PLANEX LHS 2 225 comes in the Systainer SYS3 XXL for safe, space-saving transport.

The adjustable extraction guarantees ergonomic work on walls and ceilings: The PLANEX LHS 2 225 takes the load off your arms and back when working on walls and ceilings thanks to the easy-to-adjust, powerful extraction.

Increased reach

The ergonomic T-shaped handle of the PLANEX LHS 2 225 provides additional reach even from a shorter machine – and it weighs less, too. For even higher-up spaces, the working length can be adjusted using up to two extensions.

Perfect surface quality The circumferential LED ring light on the PLANEX LHS 2 225 functions like an integrated spotlight, revealing any unevenness during sanding itself. The eccentric sanding movement creates outstanding surface quality – with no need for costly rework.

Systems get it done The PLANEX mobile dust extractor.

The powerful CTM 36 AC PLANEX is precisely designed for the high material removal rate of the PLANEX long-reach sander. With a tool holder, kink-resistant hose and standard ComfortClean closing slide for even more effective filter cleaning. The result: Perfect results at maximum speed.

You can find more information on page 170

Designed for continuous operation. The LEX compressed air eccentric sanders.

Extremely robust, durable and reliable. Ideal for continuous use because compressed air sanders are low-maintenance and lighter than power tools. Sturdy vane motors provide power, while the sophisticated IAS 3 system ensures perfect dust extraction and the vibration stop protects your health while you work.

Compressed air eccentric sander LEX 3 77/2,5

Compact sander with 77 mm sanding pad diameter and weight of 800g. Perfect for sanding small or difficult-to-reach surfaces or edges.

Compressed air eccentric sander LEX 3 125/3 LEX 3 125/5

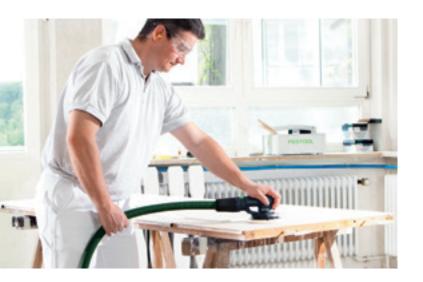

125 mm diameter and available with two different strokes: LEX 3 125/3 with 3 mm sanding stroke for a high-quality sanding finish during fine and final sanding work and LEX 3 125/5 with 5 mm sanding stroke for making fast progress during coarse and intermediate sanding work.

Compressed air eccentric sander LEX 3 150/3 LEX 3 150/5 LEX 3 150/7

150 mm diameter and available with three different strokes: LEX 3 150/3 with 3 mm sanding stroke for a high-quality sanding finish during fine and final sanding work, LEX 3 150/5 with 5 mm sanding stroke for making fast progress during coarse and intermediate sanding work and LEX 3 150/7 with 7 mm sanding stroke for removing a high volume of material in a very short time during coarse sanding work.

Maximum surface quality

The unique sanding pad brake prevents the sanding pad from turning upwards and prevents the surface being scratched during sanding, thereby minimising both reworking and costs.

Designed to fit your hand

Accurate guidance and precise sanding thanks to SoftGrip coating on the device. The well-balanced ergonomics also ensure effortless work.

Speed adjustment during sanding

The ergonomic position of the speed pre-selection enables infinite adjustment with the thumb, even during sanding.

Pad hardnesses for every application Hard, soft, ultra-soft. Festool offers sanding pads with three different degrees of hardness for work that is optimally adapted to the material and surface.

Three-fold benefits. **The Festool IAS 3 system.**

The IAS three-hose system combines three functions in a single hose: Compressed air supply, exhaust air extraction and dust extraction. Sanding dust and exhaust air are kept away from the work surface. Thanks to an intelligently designed exhaust air extraction system, no cold air escapes: Hands and wrists stay warm, work is more comfortable and better for health.

Sanding adapted to the material thanks to speed preselection.

The RUTSCHER compressed air orbital sander.

Thanks to their low weight and ergonomic shape, the RUTSCHER compressed air orbital sander fits perfectly in your hand. It features a vibration stop for healthy, effortless work. Its rectangular shape makes it ideal for flat surfaces.

RUTSCHER compressed air orbital sander **LRS 400**

The long tool for large surfaces. While still being lightweight and handy.

Cost savings thanks to the durable MPE sanding pad The MPE sanding pad is extremely durable. MPE has five times the tensile strength of sanding pads made from conventional foam rubbers and is therefore ideal for heavy-duty use.

| | SYS-STF-80x133/D125/Delta with insert for abrasives measuring 80x133 mm with dia. 125 mm and Delta, number of compartments 5, SYSTAINER size SYS3 M 112, dimensions (L x W x H) 396 x 296 x 112 mm | 576781 |
| . | Guide control black powder HB-Set for visibly checking surfaces to be sanded, hand sanding block, 2 guide control black powder cartridges (each 30 g), qty. in pack 2 Units, in carton | 495939 |
| . | Refillable cartridge 2 x 30 g refill for the guide control black powder HB set (2 x 30 g), qty. in pack 2 Units, in carton | 495940 |

03 Sanding and brushing

| cessories | | Order no. |
|-----------|---|-----------|
| | IAS hose All variants: for LEX 3, LEX 2, LRS, antistatic, in accordance with DIN IEC 312, bleeder resistor (DIN IEC 312) <1 mΩ/m, temperature-resistant up to + 70°C, hose dia. 44 mm, in carton | |
| | IAS 3-3500 AS for connecting a Festool compressed air sander to a Festool mobile dust extractor or energy box, length 3,5 m | 497208 |
| | IAS 3-5000 AS for connecting a Festool compressed air sander to a Festool mobile dust extractor or energy box, length 5 m | 497209 |
| | IAS 3-7000 AS for connecting a Festool compressed air sander to a Festool mobile dust extractor or energy box, length 7 m | 497210 |
| | IAS 3-10000 AS for connecting a Festool compressed air sander to a Festool energy box, length 10 m | 497211 |
| | IAS hose All variants: for LEX 3, LEX 2, LRS, antistatic, in accordance with DIN IEC 312, bleeder resistor (DIN IEC 312) <1 mΩ/m, temperature-resistant up to + 70°C, hose dia. 37 mm, in carton | |
| | IAS 3 light 3500 AS for connecting a Festool compressed air sander to a Festool mobile dust extractor or energy box, length 3,5 m | 497478 |
| | IAS 3 light 5000 AS for connecting a Festool compressed air sander to a Festool mobile dust extractor or energy box, length 5 m | 497213 |
| | IAS 3 light 7000 AS for connecting a Festool compressed air sander to a Festool mobile dust extractor or energy box, length 7 m | 497479 |
| | IAS 3 light 10000 AS note: not with combination of CT/SR and ASA, for connecting a Festool compressed air sander to a Festool energy box, length 10 m | 497480 |
| T | IAS adapter IAS 3-SD for LEX 3, LEX 2, LRS, for connecting a Festool compressed air sander directly to a compressed air line (without dust extraction), length 90 mm, in carton | 497214 |
| • | Air hose D 12,4 x 5 m for LEX 3, LEX 2, LRS, IAS 3-SD, the IAS 3-SD adapter is necessary for connection to the machine, length 5 m, in carton | 497215 |
| 1 | IAS double adapter IAS 3-DA-CT for LEX 3, LEX 2, LRS, CT extractor (not CT 11/MINI/MIDI), for simultaneously connecting two air tools with IAS 2 and/or IAS 3 adapter to a Festool dust extractor, Not suitable for M dust extractor, in carton | 497284 |

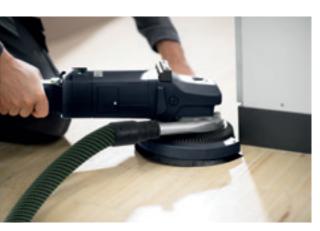

| Accessories | | Order no. |
|-------------|---|-----------|
| | Adapter | |
| | AD-IAS/D 36 note: if IAS 2/IAS 3 hoses are used without this adapter to extract dirt directly, the hoses and air tools may be damaged by dirt deposits in connecting parts, for use with D 36 suction nozzles with IAS 2/IAS 3 hoses, in bag | 488418 |
| | IAS-ZA for central extraction units, boom arms manufactured by Rupes, IVO and Herkules, and Rupes power boxes, rubber bushing for connection of IAS 2/IAS 3 air tools via an IAS 2/IAS 3 connection, exterior Ø 59/75 mm, interior Ø 49/57 mm, in carton | 489222 |
| | IAS 3-FA for LEX 3, LEX 2, LRS, for connecting an IAS 3 or IAS 3 light hose to an EAA power box or Herkules exhaust turbine, sleeve diameter 47,5 – 51,8 mm, in self-service display pack | 499025 |
| - | IAS adapter IAS-S-ZA/Herkules for connection of IAS 2/IAS 3 suction hoses to Herkules central suction system, with closing slide, in carton | 490605 |
| | Cleaning and lubricating oil All variants: for LEX, LRS, in plastic bottle | |
| | LFC 9022/50 special oil for compressed air preparation, 50 ml | 201077 |
| | LFC 9022/1000 special oil for compressed air preparation | 201076 |

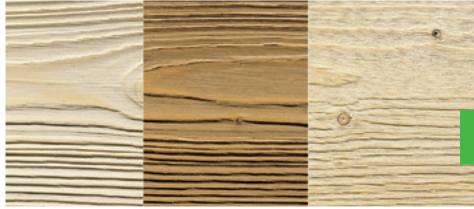

Excellence for coarse sanding. RAS 180 rotary sander and RUSTOFIX brush machine.

Our specialists for the powerful machining of wooden surfaces. The powerful 1500-watt motor reliably provides a high traction and high material removal capacity in record time. And smooth start-up, controlled speed and a temperature control to protect against overload make them ideal for demanding, continuous use.

| Technical data | RAS 180 | BMS 180 |
|---------------------------------------|-------------|-------------|
| Power consumption (watt) | 1.500 | 1.500 |
| Idle engine speed (RPM) | 800 - 4.000 | 800 - 4.000 |
| Interchangeable sanding pad dia. (mm) | 180 | - |
| Tool dia. (mm) | - | 150 |
| Spindle | M14 | M14 |
| Dust extraction connection dia. (mm) | 27 | 27 |
| Weight (kg) | 3,6 | 7,5 |

For ideal dust extraction

The dust extraction attachment safely guides chips towards the mobile dust extractor. For a clean workspace, unobstructed view and healthy working environment.

RUSTOFIX – two brushes included

Two brushes are included in the scope of delivery for texturing or intermediate sanding. The BG 80 Rustilon brushes are available as an accessory.

| Items included | Order no. |
|--|-----------|
| RAS 180 | |
| RAS 180 E StickFix sanding pad Ø 180, StickFix abrasive discs, extraction hood, screwdriver, WAF 4, open ended spanner, WAF 19, in carton | 570774 |
| BMS 180 | |
| BMS 180 E LD 85 brush, KB 85 brush, extraction hood, tool arbour, Clamping flange, screwdriver, WAF 4, open ended spanner, WAF 11, open ended spanner, WAF 14, open ended spanner, WAF 24, in case | 570775 |

| Accessories | | Order no. |
|-------------|---|-----------|
| | Sanding pad All variants: for RAS 180, connecting thread M14, in self-service display pack | |
| • • • | ST-STF-D180/0-M14 W soft version, for universal use on plain and arced surfaces | 485253 |
| | ST-D180/0-M14/2F for fibre discs Ø 180 mm | 485296 |
| | Abrasives from page 139 | |
| 9- | Auxiliary handle ZG-RAS/RO for RO 150, RAS, WTS 150, RAP 150, in carton | 487865 |
| | Rustilon brushes All variants: for BMS 180, exterior dia. 150 mm, in carton | |
| 9 | LD 85 with standard steel wire, steel core, for texturing, width 85 mm, hole dia. 50 mm | 411549 |
| | KB 85 plastic bristles with embedded K80 grit, die-cast plastic core, for intermediate sanding, width 85 mm, whole dia. 16 – 30 mm | 411969 |
| Ser. | BG 80 with sisal bristles, steel core, for smoothing, width 80 mm, hole dia. 50 mm | 411887 |

04 Abrasives

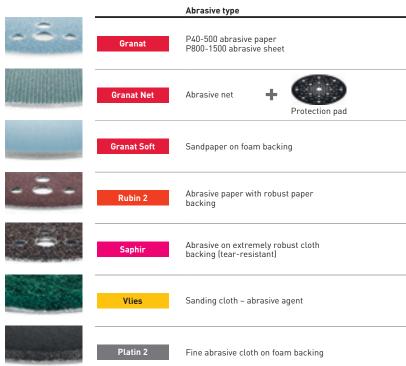

Abrasives for our machines

143 Manual abrasive

Abrasives for our machines

Manual abrasive

Granat Abrasive paper

flexible, universal manual abrasive paper for paints, repair compound, fillers, varnishes

 available as a roll (115 mm x 25 m) or in the form of sheets (230 x 230 mm) > P40-400 grit

Granat

Sanding block

see page 145

- > Four-sided, rigid sanding block in two versions:
- Standard block; ideal for sanding edges and profiles; 36–60–120–220 grit
- > Combi block; with round and acuteangled side; ideal for sanding areas that are difficult to reach and concave profiles; 120 grit

Abrasives 04

Granat

Abrasive sponge

- Two-sided flexible abrasive sponge; ideal for sanding radius profiles and mould surfaces
- >60-120-220-800 grit

Granat Soft Soft abrasive roll

- Abrasive paper on foam backing for equal pressure distribution; ideal for light and intermediate sanding
- Roll 115 mm x 25 m (perforated)
- > P120-800 grit

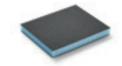

Vlies

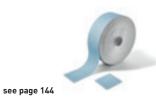

Manual abrasive cloth

- available as a roll (115 mm x 10 m) or in the form of pre-perforated pads (115 x 152 mm)
- ideal for roughening and matting old coatings before applying a new coating
- > MEDIUM 100 to ULTRAFINE 800 grit

HSK sanding blocks

- > extractable for abrasives 80 x 133 mm, 115 x 228 mm, 80 x 400 mm and 80 x 200 mm
- cannot be extracted for abrasives
 D150 mm, 80 x 133 mm and 46 x 178 mm

05 Polishing

148 Rotary polishers SHINEX

All-purpose genius. The SHINEX rotary polisher.

With the comfortably positioned variable speed trigger, the SHINEX RAP 150 rotary polisher can be controlled at low speed and perfectly adapted to the polishing task at hand. The trigger is locked to ensure a consistent speed. The heat produced by the motor is continuously cooled via an integrated heat sink. This not only protects the bearings but is also effective in the grip area: The RAP 150 remains noticeably cool during prolonged use.

| Technical data | RAP 150-14 | RAP 150-21 |
|------------------------------|-------------|-------------|
| Power consumption (watt) | 1.200 | 1.200 |
| Idle engine speed (RPM) | 600 - 1.400 | 900 - 2.100 |
| Max. polishing pad dia. (mm) | 150 | 150 |
| Spindle | M14 | M14 |
| Weight (kg) | 2,1 | 2,1 |

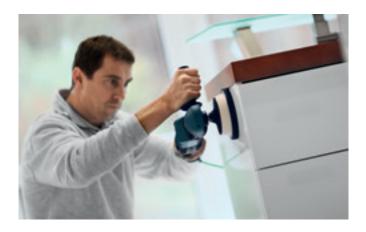

Compact and ergonomic

The RAP 150 weighs just 2.1 kg. It sits securely in your hand however you grip it, thanks to the comfortable soft grip and slim design.

Close to the surface

The small distance between the pad and the machine always gives you a good feel for the polishing, whilst also reducing the risk of tipping over.

05 Polishing

Surface preparation

Denibber

Fine sanding

MPA F+ finish cleaner

MPA SV+ spray sealant

S

MPA Microfibre cloth

RT PREMIUM cleaning cloth

Leave behind a brilliant impression. Festool polishes and polishing sponges.

Polish with ease and achieve brilliant results - Festool polishes are specially designed for their various applications. These polishes are water-based and do not contain silicone. When used in combination with the appropriate sponge they ensure reliable and optimal results for all types of coatings with minimal effort.

The clearly organised colour coding system enables users to quickly find the appropriate product.

Polish

High sanding performance and a high gloss finish in a single step

MPA 9010 Speed Gloss fine sanding polish

Fine sanding performance for intermediate and fine polishing

MPA 11010 Anti-swirl-mark high-gloss polish

Extra fine sanding performance for removing microscratches and swirl marks

Foam polishing pads

Coarse

For polishing heavily weathered surfaces (preparation for painting)

medium

For polishing and removing imperfections in paintwork. Ideal together with the MPA 5010.

medium-fine

For creating a perfect gloss finish. Ideal together with the MPA 9010.

Fine

For polishing out swirl marks and producing a deep shine. Ideal together with the MPA 11010.

Very fine

For removing polish residues on the painted surface.

Polishing felt and sheepskin pad

Hard polishing felt

For preliminary polishing of mineral materials, acrylic glass and clear coats

Soft polishing felt

For follow-up polishing of mineral materials, acrylic glass and clear coats

Premium sheepskin

scratch-resistant clear coats

Particularly suitable for UV clear coats.

Finish cleaner and spray sealant

The high-quality microfibre cloths have a scratch-free edge to ensure a perfect finish for paint. They are perfectly suited to removing polish residue and grease spots when used in conjunction with finish cleaner. The spray sealant is suitable for quickly and easily sealing painted surfaces, conserving, protecting and maintaining the paint.

164 CLEANTEC CT 15 mobile dust extractor

166 CLEANTEC CT 26, CT 36, CT 48 mobile dust extractors

168 CLEANTEC AUTOCLEAN CT 26 AC, CT 36 AC, CT 48 AC mobile dust extractors

170 CLEANTEC AUTOCLEAN CT 36 AC PLANEX mobile dust extractors

171 CLEANTEC AUTOCLEAN CT 26 AC RENOFIX, CT 36 AC RENOFIX mobile dust extractors

176 CT-VA pre-separator

174 CLEANTEC CTH 26, CTH 48 special extractor

175 CLEANTEC CT 48 EC/B22 special extractor

We recommend putting your faith in dust extraction. We strongly recommend to:

Make sure you choose the right extractor for the best possible dust extraction.

When working in a dusty environment or handling materials that generate large quantities of dust, your main priority should be protecting your health. How harmful the dust is to your health depends on the size of the particles as well as the quantity and time that the materials remain inside your lungs.

The smaller the dust particles are, the deeper they can penetrate into the lung tissue and this is why finer particles are much more harmful to the airways, with many being categorised as extremely hazardous to health. In the interests of your own health, it is imperative that you keep the air clean when handling mineral dust that invariably contains quartziferous substances and always work with a certified and approved dust extractor or safety extractor.

Your Industrial Employers' Liability Insurance Association will provide you with detailed information and specially prepared lists of substances that exceed specified OEL (occupational exposure limits).

CTL SYS CTL MINI/MIDI CTL 26/36/48

Specialists for dust with OEL > 1 mg/m³.

CTM 26/36/48 CTM MIDI

Specialists for dust with OEL ≥ 0.1 mg/m³. For quartziferous mineral dust and wood dust.

CTH 26/48

Specialists for dust with OEL < 0.1 mg/m³. For carcinogenic and pathogenic dust, e.g. asbestos and mould.

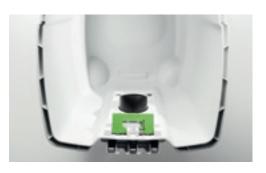

CTL 48 LE EC/B 22 CTM 48 LE EC/B 22

Specialised in the extraction of flammable and explosive dust.

Dust categories in accordance with EN 60335-2-69, Appendix AA Max. permeability (test) Disposal Contamination risk Appropriate L (Low) > Dust with OEL > 1 mg/m³ 1% (filter material) > Dust with OEL ≥ 0.1 ma/m³ 0.1% (complete tool incl. upholstery mineral dust M (Medium) Dust-free Cap for transportation nail test) > Wood dust > Dust with OEL < 0.1 mg/m³ 0.005% (complete tool incl. carcinogenic dust H (High) Dust-free Cap for transportation upholstery nail test) Dust containing pathogens

Overview | Dust extraction 06

Full usage of space

The sophisticated container geometry, compatible SELFCLEAN filter bag and space-saving flat filter combine to produce a net volume that corresponds almost exactly to the gross volume of the container.

PERTOR.

New and now even better: SYS DOCK Simple transportation, better organisa

Simple transportation, better organisation and endless flexibility. The SYS-Dock with T-LOC for the safe connection of SYSTAINER, SORTAINER and SYS-ToolBox units.

Cable holder

The cable can be wound up quickly and neatly thanks to the new cord holder. And – thanks to the sophisticated folding mechanism – it can be easily removed from the holder without complex unwinding. Now also available with the CT MINI and MIDI compact extractors.

Hose garage

The integral hose holder eliminates the need for external hooks and protects the suction hose and mains cable from damage. The suction hose winds around the holder for clean, compact transportation.

Smooth suction hose with CLEANTEC sleeve

The new suction hose: Smooth and flexible – with a smooth exterior for perfect sliding over surfaces, a longer service life and greater suction power. The new CLEANTEC extraction sleeve ensures a secure fit on the tool.

AUTOCLEAN automatic main filter cleaning system

Less cleaning work and constant suction power. The AUTOCLEAN automatic cleaning system eliminates the need to clean the main filter manually. Individual cleaning intervals can be defined to guarantee powerful, constant suction.

Simply the best for dust-free work.

The best mobile tool for your health – the new CT MINI and MIDI compact extractors with new highlights: innovative touch operating concept, internal hose holder for the smooth suction hose, level storage area and manual dedusting with fast access to the main filter from the outside.

Approved for dust class M for the first time as CTM MIDI and equipped with suction hose detection for automatic adjustment to the right suction hose diameter.

Already integrated in the CT MINI and MIDI and simple to retrofit for the CT 26/36/48 mobile dust extractors: The innovative Bluetooth[®] technology that yields benefits when using cordless tools and for manual cleaning tasks.

Simply communicative: Extraction with Bluetooth[®] control*.

Directly integrated or simple to retrofit

Directly integrated in the CT MINI and MIDI, simple to retrofit in the free slot on the CLEANTEC CT 26/36/48 mobile dust extractors*: The Bluetooth® module* – and the mobile dust extractor can easily be controlled remotely straight away via the remote control on the suction hose or the Bluetooth® battery pack on the cordless tool.

Bluetooth® remote control*

Saves you a trip to the extractor: For switching on the mobile dust extractor directly at the suction hose – even when the extractor is in AUTO mode. Ideal for occasional cleaning tasks.

Bluetooth[®] battery packs*

For communication with the Bluetooth[®] module on the mobile dust extractor – and to make sure that even a cordless tool can start the mobile dust extractor automatically when switched on. Available as an accessory and automatically included with many Festool cordless products.

* Bluetooth[®] module available as an accessory. Installation must be carried out by a qualified and certified electrician. The versions with Bluetooth[®] technology are not available in all countries. Please contact your local dealer for further information.

Spotless and space-saving. The extractor in SYSTAINER format.

The CLEANTEC CTL SYS is the ideal companion for fast and mobile use during relatively small fitting and servicing work: Very compact, lightweight and quiet, and can be coupled with a SYSTAINER system.

SYSTAINER extractor

Compatible with T-LOC in a SYSTAINER system for optimum workplace organisation.

| Technical data | CTL SYS |
|---|-----------------|
| Power consumption (watt) | 1.000 |
| Max. volume flow (l/min) | 3.000 |
| Max. vacuum (Pa) | 20.000 |
| Filter surface area (cm²) | 5.357 |
| Rubber-insulated mains cable (m) | 5 |
| Container/filter bag capacity (l) | 4,5/3,5 |
| Dimensions (L x W x H) (mm) | 396 x 296 x 270 |
| Max. appliance socket connected load (watt) | 1.200 |
| Weight (kg) | 6,9 |

Spotless, right down to the very last corner The CTL SYS has an integrated crevice nozzle and upholstery nozzle always close to hand for a clean finish, even in hard-to-reach places.

Mobile dust extractor

When combined with the SYS cart, the CTL SYS is provided with a set of wheels, allowing it to follow you with the cumulative suction power of the 1000 W turbine virtually every step of the way.

Easy to transport in fewer trips

Thanks to the shoulder strap supplied with it, the CTL SYS is easy to carry, leaving your hands free for any other materials or tools you might need.

Simply flexible

Smooth, elastic and extremely robust. The smooth suction hose will win you over thanks to its improved handling and longer service life. It glides over every edge and possesses conical geometry for increased suction capacity.

| Items include | 1 | Order no. |
|---------------|---|-----------|
| CTL SYS | | |
| | CTL SYS fitted filter bag, smooth suction hose dia. 27 x 3 m AS/CT with rotating angle adapter on the extractor side, hose holder, SYS-Dock with T-LOC function, upholstery nozzle D 36 PD, crevice nozzle D 36 FD-150, SYS-CT carrying belt, in carton | 575279 |

Compact. Mobile. Sophisticated. The CT MINI and CT MIDI mobile dust extractors.

Low weight, compact dimensions and a wealth of innovative details – the new CT MINI/MIDI compact dust extractors boast a comprehensive range of enticing features. With intuitive touch operation and a level storage area for tools and work materials, as well as an internal hose holder, Systainer T-LOC coupling and a practical cord holder for tidy and efficient working.

M

Mobile dust extractor **CLEANTEC CT MIDI I**

With automatic suction hose detection and 15 l container capacity for class L and M dusts.

Touch operation

Innovative and intuitive touch control panel instead of rotary knobs – extremely simple operation even when wearing gloves or in a dirty environment. When switched on, the extractor is automatically in automatic mode. The automatic switch-on for mains-operated and Bluetooth® cordless tools and Bluetooth® remote control is activated.

Manual cleaning

Manual dedusting of the main filter and filter bag means the suction power can be restored once the filter or filter bag is inserted for a significant increase in filling capacity.

Filter replacement from outside Quick, easy and tool-free.

Smooth suction hose

With conical geometry for improved suction power, smooth outer skin allow it to glide over all surfaces and edges perfectly.

Simply communicative. Integrated Bluetooth® technology*

For automatically switching on the mobile dust extractor via remote control or the Bluetooth® battery pack*. No retrofitting required. Perfect for working with Bluetooth® cordless tools.

* The versions with Bluetooth[®] technology are not available in all countries. Please contact your local dealer for further information.

You can find more information on page 23

The specialist for cleaning work. The practical mobile dust extractor.

Ideal for cleaning on construction sites, in workshops and offices: With a 15 l container volume, the CLEANTEC CT 15 extracts dust, dirt and water. Its design ensures that almost the entire container volume can be used – for long periods of work without having to change the filter bag.

Mobile dust extractor **CLEANTEC CT 15**

Cleaning accessories already included with delivery. Extractor with 15 l container capacity.

Cleaning accessories directly included

Crevice nozzle and upholstery nozzle can be stored in the mobile dust extractor.

Touch operation Intuitive touch control panel instead of rotary knobs – for extremely simple operation even when wearing gloves and when dirt builds up.

The true size can be found inside. The all-round mobile dust extractors.

Compact yet effective. Lightweight yet powerful. Whether on the construction site or in the workshop – the generous container geometry of the CLEANTEC CT 26/36/48 offers a significantly larger capacity with compact dimensions. The extremely compact high-performance turbine supplies the appropriate suction power with a volume flow of 3900 l/min. With antistatic function to prevent build up of static charge when working.

Simply flexible

Smooth, elastic and extremely robust. The smooth suction hose will win you over thanks to its improved handling and longer service life. It glides over every edge and possesses conical geometry for increased suction capacity.

Large capacity

The filter bag is free to unfold because of the flat filter and the smooth inner contours of the container. This allows the bag to be filled uniformly and a nearly 100% utilisation of the filter bag volume.

Safe transport

Accessories and tools in the SYSTAINER, SORTAINER and SYS tool box can be quickly and easily connected to the extractor via the SYS dock thanks to the T-LOC system.

Optional extension

Depending on requirements, the extractor can be equipped with additional modules, such as a compressed air module, an electrical outlet module with continuous power or automatic electronic switch-on/shut-off switch, an energy box module or a Bluetooth® module*.

* The versions with Bluetooth® technology are not available in all countries. Please contact your local dealer for further information.

Our service. **Your success.**

Direct, practical and comprehensive service for you and your tool. Along with excellent tools, we also offer outstanding-quality services – throughout a tools' entire service life.

You can find more information on page 4

Fully automatic filter cleaning. The self-cleaning mobile dust extractors.

No more clogged filters – the AUTOCLEAN (AC) automatic main filter cleaning keeps the filter clean and ensures continuously high suction power for large quantities of fine dust. With antistatic function to prevent static charge when working.

Safe transport

Accessories and tools in the SYSTAINER, SORTAINER and SYS tool box can be quickly and easily connected to the extractor via the SYS dock thanks to the T-LOC system.

Adjustable according to requirements

The cleaning intervals can be continuously adjusted using the rotary switch. The shorter the interval, the more intensive the cleaning.

Simply flexible

Smooth, elastic and extremely robust. The smooth suction hose will win you over thanks to its improved handling and longer service life. It glides over every edge and possesses conical geometry for increased suction capacity.

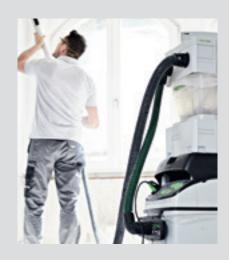

Optional extension

Depending on requirements, the extractor can be equipped with additional modules, such as a compressed air module, an electrical outlet module with continuous power or automatic electronic switch-on/shut-off switch, an energy box module or a Bluetooth[®] module*.

Ideal for demanding everyday use on construction sites The CT-VA pre-separator.

Handles high levels of dust thanks to cyclone technology. Ensures constant high suction power thanks to removal of load from the main filter.

You can find more information on page 176

Ideal for drywall construction.

The mobile dust extractor for PLANEX long-reach sander.

The powerful CLEANTEC CTM 36 AC PLANEX with 36 l container capacity is precisely designed for the high material removal rate of the PLANEX long-reach sander. With a kink-resistant hose and standard ComfortClean closing slide for even more effective filter cleaning.

Heavy-duty tool.

The construction site extractor with automatic cleaning function.

When it comes to handling particularly large quantities of dust, which can accrue when working with surface-restoration millers and diamond grinders, the RENOFIX extractors are in their element. The AUTOCLEAN (AC) automatic main filter cleaning system regularly rinses the high-performance main filter clean and guarantees a constantly high suction power.

Mobile dust extractor CLEANTEC CT 36 AC RENOFIX

36 l container capacity for class L and M dusts.

Manual cleaning

Even heavily clogged filters can be cleaned: When the container inlet is closed manually with the ComfortClean sealing slide, a strong vacuum is generated, which cleans the filter with maximum force.

Mobile dust extractor CLEANTEC CT 26 AC RENOFIX

With 26 l container capacity for class L dusts.

Systems get it done Can be coupled with SYSTAINERS and SORTAINERS on the SYS dock. Plug-in system for additional modules: Compressed air or Bluetooth®*.

No chance for hazardous dust. The special extractors.

Hazardous dusts such as mould and asbestos, harmful wood preservatives, mineral fibre dust, lead, cadmium, nickel and zinc chromate are reliably extracted by the CLEANTEC CTH. The dust extractor with 99.995% filter collection efficiency is a specialist tool for extracting carcinogenic and pathogenic dusts.

Mobile dust extractor CLEANTEC CT 48 EC/B22

To ensure maximum safety, the CT 48 EC/B22 special extractor conforms to the ATEX Directive 94/9/EC for zone 22. This means that dry, combustible dust on machines and tools is reliably extracted.

| Technical data | CT 48 EC B22 |
|-----------------------------------|-----------------|
| Power consumption (watt) | 150 – 1.100 |
| Max. volume flow (l/min) | 3.400 |
| Max. vacuum (Pa) | 23.000 |
| Rubber-insulated mains cable (m) | 7,5 |

| Dimensions (L x W x H) (mm) | 630 x 406 x 640 |
| Weight (kg) | 18,6 |

Convenient and safe

The robust ABS plastic container is equipped with additional flame protection and is therefore suitable for the safe extraction of aluminium, paper, soot and powder coating dust right through to glass and carbon-reinforced plastics.

| Items included | | | Order no. |
|---|---|--|-----------|

| | CTM 48 E LE EC B22 R1 | | 575286 |

Attached to Festool mobile dust extractors without tools via the SYS dock, the WCR 1000 Workcenter turns any Festool mobile dust extractor from CLEANTEC CT 26 onwards into a mobile, individually configurable compact work station.*

You can find more information on page 340

Copes with high volumes of dust. Efficient, simple and reliable.

The pre-separator.

From now on, large quantities of dust and chips are not a problem any more - neither for the main filter nor for the suction power. Up to 80% of mineral dusts and up to 95% of large dusts such as sawing chips are separated and collected in the collecting vessel. This takes the strain off the main filter and guarantees consistently high suction power throughout the entire work process.

Pre-separator **CT-VA**

Copes with high levels of dust thanks to cyclone technology. Approved for dust classes L and M.

System accessories

| Technical data | CT-VA |
|-----------------------------|-----------------|
| Dimensions (L x W x H) (mm) | 395 x 295 x 515 |
| Max. container capacity (l) | 20 |
| Weight (kg) | 7 |

178 from page Items included Order no. CT-VA CT-VA-20 cyclone Systainer, VAB-20 collection container, Systainer pan, connecting hose, disposal bag, container lid, 204083 in carton

Easy retrofitting

Compatible with Festool mobile dust extractors CT 26/36/48 – with and without AC dedusting. Approved for dust categories L and M.

Flexible to use

Flexible operation with or without CT preseparator depending on the application. The mobile dust extractor and CT pre-separator can be connected easily using the SYS-Dock system.

Easy disposal

Easy and safe to transport thanks to a stackable collection container with compact dimensions and a sturdy design.

| Accessories | | Order no. |
|-------------|---|-----------|
| 1 | Disposable bag ENS-VA-20/10 ideal shape for CT-VA 20 pre-separator collection container, for class L and M dust, for use in VAB-20 collection container, includes 10 cable ties, qty. in pack 10 Units, max. container capacity 20 l, in carton | 204296 |
| | Collection container VAB-20/1 for CT-VA 20 pre-separator, can be stacked, with compact dimensions, easy to handle and robust design, can be well sealed for transportation using the cover (included in scope of delivery), dimensions (L x W x H) 395 x 295 x 350 mm, max. container capacity 20 l, in carton | 204294 |
| | Connecting cable CT-VA AK for CT-VA 20 pre-separator, for retrofitting the CT-VA pre-separator with additional electrical outlet module, enables particularly easy connection of the plug it suction hose with the CT-VA pre-separator, max. appliance socket connected load 2.400 watt, cable length 0,85 m, in carton | 575667 |

07 Drilling and screwdriving

CXS, TXS cordless drills

T 18+3, C 18 cordless drill

QUADRIVE cordless percussion drill

202 Cordless hammer drill BHC 18

204 Cordless drywall screwdriver DURADRIVE

Drill QUADRILL

When it comes to performance, size really isn't that important.

The extra-small cordless drill.

The compact cordless drill XS generates large amounts of torque and packs amazing power, even in awkward spots. With an extremely compact design and balanced weight distribution, it makes it possible to quickly perform work above head height or at an angle. The XS class is a versatile aid for demanding applications, whatever the circumstances.

Everything is close to hand in an instant

Keep your hands free at the right moment by conveniently attaching the machine to your belt: The belt clip is suitable for right- and left-handers, without the need for tools.

Amazingly powerful

The CXS can overcome any challenge with 10.8 V Lithium-ion battery packs. 12 available torque settings for controlled power.

For quick changes between drilling and screwdriving.

The cordless drills from the C and T 18 class.

For full flexibility when drilling and screwdriving: Fully electronic torque adjustment, CENTROTEC quick-change system, angle attachment, eccentric adapter and depth stop can handle every drilling and screwdriving application. The combination of Li-HighPower battery pack and brushless, therefore maintenance-free, EC-TEC motor makes the C 18 and T 18+3 cordless drills light, powerful and durable.

Cordless drill **C 18**

Power and endurance in the ergonomic C model.

Top performance

Festool has combined EC-TEC motor technology with intelligent motor management and thereby developed it further. The brushless EC-TEC motor is wear-free and converts the energy from the battery into power with virtually no loss. This means that the efficiency of C and T screwdrivers is enormous for their performance class. The electronic motor management also guarantees a longer service life: Microprocessors monitor and control the temperature, voltage and current consumption of the motor, electronics and battery.

Cordless drill T 18+3

Power and endurance in the classic T model.

In the smallest of spaces

The angle attachment is perfect for work around corners and reaching concealed screws at tight angles.

With four gears and full power – to last a lifetime. The QUADRIVE cordless drills – with and without impact feature.

QUADRIVE. With robust four-speed metal gearbox for transmitting extreme power and speeds: In this way, screwdriving is powerful with 60 Nm torque in first gear and precise drilling is almost child's play with 3800 rpm in fourth gear. No matter whether you are working with wood or metal – the QUADRIVE series, with its brushless, maintenance-free EC-TEC motor, stands for high endurance and is tough enough for any job.

EC-TEC

Brushless EC-TEC motor with integrated motor management for a long service life and maximum performance, marked by the tremendous impact energy of the QUADRIVE. Combined with the high-quality 18 V 5.2 Ah Li-ion battery packs, EC-TEC not only achieves maximum performance, but also maximum endurance.

> **60 Nm in first gear** The QUADRIVE can insert even 10 x 300 mm screws effortlessly.

Variety with just one click

Rapid change of attachments thanks to the FastFix interface without the need for any tools.

Li-HighPower Compact battery pack: Full power at a low weight.

In order to ensure that work is as non-fatiguing as possible, the Li-HighPower Compact battery has a reduced weight, with no detriment to performance. Thanks to the Li-HighPower cell technology, it is powerful enough for any application. With a weight of under 600 grams, it is both 20% lighter and 50% more compact than a 5.2 Ah standard battery pack.

Fully reliable

Thanks to their high-current rechargeable cells, the Li-HighPower Compact batteries are extremely durable.

Built-in convenience

The Bluetooth[®] version of the Li-HighPower battery pack safeguards your health, starting a connected mobile dust extractor automatically when the tool is switched on.

The versions with Bluetooth® technology are not available in all countries. Please contact your local dealer for further information.

| | | |

Battery and charging technology from page 22

Faster processes with the CENTROTEC quickchange system and the FastFix attachments – all without the need for additional equipment.

Eccentric adapter For driving in screws close to edges.

Chuck

The standard width of up to 13 mm also enables the use of all standard bits and drill bits with cylindrical shank.

CENTROTEC tool chuck

A chuck and bit holder in a single tool which is 50% smaller and 80% lighter than a standard chuck. And all this without compromising on quality; in fact, the opposite is true. The hexagon holder transfers force safely and prevents the drill bit from jamming and slipping. At the same time, this principle ensures high true-running precision. The CENTROTEC tool chuck can be fitted to all Festool cordless drills with a FastFix interface: For instant changes in the three-way balance between drilling, countersinking and screwdriving in assembly work.

A tool that will stand the test of time. The cordless impact screwdriver.

Offers an impressive service life thanks to its extremely robust hammer mechanism. Moreover, the turning screw will take the full force of the TID 18 with its ¼" tool holder – with no strain at all on your wrist: This is thanks to the tangential hammer mechanism with no strength-sapping back torque. The machine weight of just 960 grams also allows you to work for longer without becoming tired.

| Technical data | TID 18 |
|---|-----------------------------------|
| Battery voltage (V) | 18 |

Cordless impact driver | Drilling and working with screws 07

Intelligent power.

The TID 18 cordless impact screwdriver offers extremely strong performance and ensures that work is tailored to the material with three speed settings. The clever T-mode detects the transition between sheet metal and wood and automatically adapts the speed.

Ergonomic

The compact design enables you to work accurately and for longer without becoming tired, even in hardto-reach areas.

The most powerful compact hammer drill The BHC cordless hammer drill.

Ergonomically C-shaped and balanced weight distribution to guarantee effortless work. The combination of brushless EC-TEC drive and integrated motor management produces an extraordinarily high impact energy that can penetrate any concrete quickly and powerfully. The vibration damping absorbs impact energy before it is transferred to your hand.

Cordless hammer drill **BHC 18**

Drilling holes with pneumatic impact action for dowels up to 18 mm in concrete, stone and masonry. Weighing only 2.5 kg and with excellent balance, it is ideally suited for continuous use for interior finishing and assembly.

| Technical data | BHC 18 |

| Weight with Li-lon battery (kg) | 2,3/2,5 |

Vibration and emissions values can be found in the operating manual at www.festool.com/vibration

Simply communicative

The Li-HighPower Compact Bluetooth® battery pack* communicates with the $\mathsf{Bluetooth}^{\circledast}$ module* on the CLEANTEC mobile dust extractor** and starts it automatically when the tool is switched on. In this way, you also benefit from the complete Festool dust-free system when working with the hammer drill in combination with the drill dust nozzle.

Working with extraction

Dust-free, residue-free drilling with a secure hold: Thanks to the drill dust nozzle and the patented dualchamber system, drilling holes up to a maximum diameter of 12 mm in floors, walls and ceilings is effortless. A flexible joint piece ensures the optimum hose position and the foam rubber pad provides a secure hold even on uneven surfaces.

Impact can be disabled E.g. for drilling tiles.

Battery and charging technology from page 22

Power and durability for interior work. The DURADRIVE cordless drywall screwdriver.

Works at extremely high cycle speeds and sets a new rhythm for dry mortarless construction. One important factor in this is the innovative stop-and-go function, which ensures the motor is only working when it is needed. The result: An increase of up to 40% in the number of screws that are inserted per battery charge, improved comfort and higher speeds for driving in multiple sets of screws. For speed which can be further increased by the magazine attachment.

| Technical data | DWC 18-2500 | DWC 18-4500 |
|--------------------------------------|-------------|-------------|
| Battery voltage (V) | 18 | 18 |

| Weight with depth stop (kg) | 1,6/1,8 | 1,6/1,8 |
| Weight with magazine attachment (kg) | 2/2,2 | 2/2,2 |

Precision working

The depth stop can be attached without tools and adjusted in increments of 0.1 mm. This ensures that the screws are secure at consistent insertion depths. This eliminates the need for time-consuming reworking from the very beginning.

Lightweight

The compact version is even easier to handle: With the 400 g 3.1 Ah compact battery pack. Ideal for screw joints above head height.

High-torque. The QUADRILL drill.

The QUADRILL DR 20 is the powerhouse for extreme drilling and screwdriving tasks: Ideal for drilling holes up to 20 mm in steel or 65 mm in wood and with a 98 Nm torque for screws up to 12x300 mm. The XL CENTROTEC and FastFix quick-change system ensure flexibility, while the angle chuck which can be adjusted for any working position provides maximum comfort while working.

| Chuck interface | FastFix |
| Collar dia. (mm) | 57 |
| Weight (kg) | 3,2 |
| Weight (without chuck) (kg) | 2,7 |

Extremely robust

The large collet with reinforced drive shaft and large spindle makes the QUADRILL extremely robust – perfect for the construction site.

In the smallest of spaces

The angle attachment is perfect for work around corners and reaching concealed screws at tight angles.

Clearer, faster, more effective – working with the organiser

The Systainer³ Organiser guarantees perfect organisation and a clear overview: Small parts, accessories and consumables are safely stored away in the various plastic containers and are easy to transport. The transparent lid allows you to see everything at a glance. What's more, thanks to the T-LOC central control element, it can be closed, opened and connected with a single turn.

08 Routing

Edge trimming system

221 Routing template

Worktop template

216 Routers

Jointing system

(Module) edge routers

Aluminium composite milling machine

Routing tools

Real all-rounders – in three performance classes. The routers.

Grooving, chamfering, rebating or contouring – anything is possible with these routers. Maximum precision thanks to adjustment of the routing depth accurate to 1/10 mm and MMC electronics for temperature monitoring and adaptation to the material you are working with. Complete safety thanks to the quick-acting brake which brings the routers to a stop within seconds.

Router **0F 1010**

Lightweight, compact router with 55 mm routing depth adjustment range and handle for safe one-handed and two-handed operation when routing edges, dovetail joints and circles.

Router **OF 1400**

The all-rounder for routing. Power and ease of operation in perfect harmony. With its 70 mm routing depth adjustment range, it is the perfect machine for making recesses for fittings and for routing with templates.

Router **0F 2200**

The 2200-watt powerhouse with enormous torque and a large routing depth adjustment range of 80 mm. Can be used for solid hardwood door fittings or in staircase construction.

Short set-up times

The ratchet principle on the OF 1400 and OF 2200 enables the copying ring to be changed without the need for additional equipment and the router to be replaced with ease.

The Festool cutters

Festool cutters allow you to tackle a wide range of applications safely and optimally. Machines, cutters and useful accessories – expertise from a single source.

Ultimate precision

Torsionally rigid base plate thanks to guide columns clamped on both sides on the OF 1400 and OF 2200.

Equipped for any task

The system accessories help you work more quickly. Starting with the multi-routing template, to the hole series guide rail, through to the VS 600 jointing system. They eliminate the need to spend time producing handmade routing templates.

99% dust extraction. **Cleaner, healthier work.**

The unique chip deflector ensures efficient dust extraction and guarantees maximum suction power when routing edges in combination with the dust extraction attachment and a Festool mobile dust extractor.

Edge trimming system **OF-FH 2200**

With the Festool routing aid and the router, front grooves for door seals can be routed directly on the construction site, achieving results which are equal to those of bench-mounted routers. And thanks to the integral dust extraction, the environment also remains free of wood dust.

| Items included | Order no. |
|-------------------------|-----------|
| OF-FH 2200 in carton | 495246 |

Routing door seals

HW "Schall-Ex" and "Planet" groove cutter. The perfect solution when installing automatic door seals on-site.

Routing template MFS 400, MFS 700

Perfect for various curves, round or square cut-outs and routing stair stringers. A scale on the profile which is accurate to the millimetre makes it possible to work with complete precision. The prepared groove allows the MFS to be quickly secured to the workpiece using Festool fastening and lever clamps.

| Technical data | MFS 400 | MFS 700 |
|--------------------------------|-----------|-----------|
| Dimensions length x width (mm) | 300 x 100 | 600 x 300 |
| Curves (mm) | 40 - 300 | 40 - 600 |

| Items included | | Order no. |
|--|-------------------------|----------------------|
| All variants: 2 x angle stop, tilt protecti in carton | on, circle routing inse | rt, MFS screwdriver, |

| MFS 400 | 492610 |
|---------|--------|
| MFS 700 | 492611 |

Can be extended systemically With guide extensions from 200 mm to 2000 mm.

Worktop template **APS 900/2**

Clean corner and panel joints are easy to produce with the worktop template. The permanently fixed template guarantees precise results, even when several routing operations are carried out on a single groove.

| Technical data | APS |
|---|------------------|
| Dimensions (L x W x H) (mm) | 1.000 x 380 x 16 |
| Panel depth with corner joints, without adjustment (mm) | 600/650 |
| Panel depth with corner joints, with adjustment (mm) | 900 |
| For worktop connectors, bolt length (mm) | 65/150 |

| Items included | Order no. |
|--|-----------|
| APS 900/2 corner connection template, profile MFS-VP 1000, 3 x Bolt, MFS screwdriver, in carton | 204219 |

Precision as standard

For corner and panel joints with fixed fence with panel depths of 600 and 650 mm or, if moved, up to 900 mm.

| Accessories fo | r MFS and APS 900/2 | Order no. |
|----------------|---|-----------|
| | Extension profile All variants: for extension of MFS 400, MFS 700, longitudinal connectors, screwdriver, WAF 2.5, in carton | |
| | MFS-VP 200 with scale, 2 x profile 200 mm | 492722 |
| | MFS-VP 400 with scale, 2 x 400 mm profile | 492723 |
| | MFS-VP 700 with scale, 2 x profile 700 mm | 492724 |
| | MFS-VP 1000 with scale, 2 x profile 1000 mm | 492725 |
| | MFS-VP 2000 without scale, 2 x profile 2000 mm | 492726 |
| | Router carriage MFS-FS for large-surface routing, for MFS 400, MFS 700, traverse path 600 mm, copy ring dia. 30 mm, in carton | 495648 |
| 1 | Groove cutter with reversible blades HW S12 D14/45 WM for OF 1400, OF 2200, D 14 mm, NL 45 mm, GL 105 mm, s 12 mm, in self-service display pack | 491110 |
| - | Groove cutter HW S12 D14/50 D 14 mm, NL 50 mm, GL 100 mm, s 12 mm, in self-service display pack | 491089 |

Hole series system **LR 32**

When used together with a Festool OF 1010 or OF 1400 router and a guide rail, the LR 32 system makes it possible to drill precise sets of holes spaced 32 mm apart.

| Technical data | LR 32 |
|---|---------------|
| Hole spacing (mm) | 32 |
| Length of series of holes (without guide extension) | 1.400 / 2.424 |
| Side stop setting range (mm) | 0 - 110 |
| Weight (kg) | 0,9 |

Holes in series

The LR 32 guide rail is aligned quickly and parallel to the two parallel side fences, which are positioned by means of an adjustable stop at the workpiece and guide rail.

| Items include | ed | Order no. |
|---------------|--|------------------|
| LR 32 set | LR 32 Set guide plate, centring mandrel, 2 x side stop, 2 x Longitudinal stop, in carton | 583290 |
| LR 32 | LR 32-SYS guide plate, centring mandrel, hinge location cutter HM Ø 35 mm, dowel drill HW Ø 5 mm (V-shaped tip), dowel drill HM Ø 5 mm (with centring bit and pre-cutter), 2 parallel side fences with adjustable stop, clamp FSZ 120, 2 x Longitudinal stop, screwdriver, WAF 5, in SYSTAINER SYS 1 T-LOC | 584100 |

The edge experts. The edge routers and module edge routers.

Edge routers provide the solution for an even, clean finish: Suitable for edge veneers, flush trimming, chamfering, rounding, contouring and cutting grooves. The compact design means that the handle position is located close to the router, therefore guaranteeing reliable guidance when working on straight and curved edges.

The multi-talent for edge routing.

Module edge router **MFK 700**

The universal edge router with exchangeable table – also suitable for routing grooves.

Module edge router **MFK 700 Basic**

The specialist in edge routing – flush trimming and rounding off in a single step. Perfect in combination with the CONTURO edge bander.

Surface protection

The bench of the OFK 700 and the MFK 700 is inclined by 1.5° to protect the surface from damage. The slight inclination of the cutter prevents the surface from being milled off.

The finishing touch for the perfect edge The MFK 700 EQ/B-Plus module edge router with special base for flush trimming edge veneers – even on edges cut at 45°. Thanks to the newly developed ball bearing brake with integrated chip deflector, it operates cleanly and efficiently without streaks.

Large support surface

A large, precision-adjustable bench surface enables the MFK 700 to be optimally guided along the edge of the workpiece. Even when routing around corners, the machine does not tilt or route into the surface.

Particularly compact

The OFK 500 works with an especially small spacing between the router and router table. The result: No routing mistakes, no slipping when working around corners and a better result on the whole.

Machine workpieces from all sides. The VAC SYS vacuum clamping system.

Machine workpieces from all sides in a single work step – with no need to reclamp. VAC SYS exemplifies simple, ergonomic, quick working.

You can find more information on page 338

Expertise in routing. The Festool cutters.

If you want to achieve guaranteed quality, compromise is out of the question. That is why we recommend original Festool routing accessories for all Festool routers. Produced with the same care as the tools. With cutting blades which impress with their micro-grain quality and density. And which ensure superb results and an excellent service life with their cutting edge geometry. Machines, routers and accessories – we provide optimum equipment from a single source for versatile and efficient working.

The right material for every application

- HW Tungsten carbide HW routers are ideally suited to processing hardwood, panel materials and plastic.
- HS High performance, high speed steel This steel has mechanical and thermal properties that are best suited for routing soft materials such as spruce and pine.

GL Total length (mm) NL Effective length (mm) D Cutter diameter (mm) s Shank diameter (mm) alpha Cutting angle (°) R Radius (mm) Υ Marking for minimum clamping length \mathbb{A} n max. = maximum cutter speed HW Tungsten carbide HS High-speed steel

Tip: For optimum routing patterns, the routers should always be clamped at the lowest depth possible, and at least as far as the marking for minimum clamping length on the router shank.

Long service life, even when plunge cutting.

If you wish to achieve quality cutting results with ease when drilling, grooving, rebating and long-hole routing, you are best advised to use the HW groove cutter. It cuts precisely, makes drilling easier and has a long service life.

Hard-wearing drill point.

After drilling 60 holes in a kitchen worktop (30 mm deep): Cutting edge only shows slight signs of wear.

Ground drill point. After drilling 60 holes in a kitchen worktop (30 mm deep): Blunt cutting edge.

The router bit box contains ten router bits for the most important and most frequent applications. This therefore offers a price saving compared with purchasing each of them individually. The individual router bits are clearly organised and safely stored in a transparent router bit magazine in the router bit set.

Routing without a copying ring.

This cutter can produce curved or round water channels 1:1 without any problem using a template. Time-consuming calculation of curves and distances is no longer necessary.

Precision – even after sharpening.

When sharpening blunt edges on conventional cutters, the diameter aligned to the ball bearing guide normally decreases. This causes a ridge to form when edges are trimmed flush after the bit is sharpened. The turning plate slot cutter and ball bearing guide maintain a high level of precision.

Edge trimming chamfer cutter, drilling cutter, rebating cutter

3 different cutter spindles are available for use of the disc groove cutter from 1.5 mm to 5 mm groove width.

Cutter spindle 1 has a fixed shaft, which is not suitable as a thrust surface (fire hazard). Therefore, this cutter spindle is only intended for work with a side stop.

Cutter spindle 2 is equipped with a 16 mm ball bearing (above the disc slot), which serves as a thrust surface. With this cutter spindle, a groove depth of 12 mm results from the use of the 40 mm disc slot.

Cutter spindle 3 is equipped with a 28 mm ball bearing (above the disc slot), which serves as a thrust surface. With this cutter spindle, a groove depth of 6 mm results from the use of the 40 mm disc slot.

Precise and durable.

491408

Mineral materials are very demanding on the cutting blade. When working with the ball bearing guide, it is absolutely vital that the cutter and ball bearing guide are permanently aligned. This is why tools with reversible blades pay dividends within a very short time.

Simply ingenious.

Order no.

If the cutting blade is not aligned with the ball bearing guide exactly after sharpening, the join to the cutter blade can be readjusted by moving the axial ball bearing guide, extending the service life of your Festool basin cutters even longer.

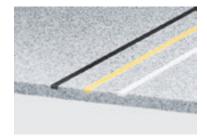

Carbide-tipped facing cutter, Shank 12 mm

To suit any task.

Flat protruding edges, e.g. pilaster strip inserts, can be trimmed flush without any problem using the plane cutter.

Cutting inlays flush or routing overhangs on fitted basins at an angle of 11°. Both are possible simply by changing the ball bearing guide included in the delivery.

09 Joining

DOMINO joining machines

259 DOMINOs

More precise joints. The DOMINO joining machines.

Unique among manual machines and patented by Festool: The DOMINO DF 500 jointer routing motion. The simultaneous rotating and pendulum movement of the router allows smooth working and holes without scorch marks. Thanks to the pendulum motion, the routers do not overheat, leading to an extremely long tool life.

Joining machine **DF 500 Q-Plus**

The DOMINO DF 500 is particularly easy to handle and offers almost unlimited jointing possibilities. No matter whether it is panel or cabinet construction, for lightweight frame or rack joints – the DF 500 impresses with maximum precision, flexibility and simple handling.

Joining machine **DF 700 EQ-Plus**

Comes to the workpiece and not vice versa: DOMINO XL. Quick, simple, precise and extremely stable – with measurably shorter tooling times and up to 50% time-saving in comparison to stationary machines. The DOMINO XL is therefore ideally suited for furniture and door construction and solid wood joints.

Joining machines | Joining 09

Innovative stop system

One of the main time-based advantages of working with the DOMINO jointer arises from working without complicated measuring or marking. With the DOMINO DF 500, the fast and precise positioning is quite simple thanks to the stop catches; with the DF 700 this is enabled by stop pins.

Long-hole principle

Custom-fit alignment: The first DOMINO is positioned in a precision cut elongated hole, the next DOMINOs are inserted into wider elongated holes with play so that the joint can be aligned effortlessly. The result is a stable joint, protected against rotation from the first DOMINO.

Save time when using the same cutting depth over and over again You select your required routing depth using the detent lever lock on the DF 500. The options are 12 mm, 15 mm, 20 mm, 25 mm and 28 mm. On the DF 700, you can use the variable routing depth setting to select between 15–70 mm and set two freely selectable "flag" positions.

The right solution for every combination. **The DOMINO system.**

Create robust joints quickly and simply with the DOMINO connectors – and loosen them again when required. Perfect for corner and surface joints, and now also for centre panel joints and joints between series of holes. The cover caps in various colours provide the perfect finishing touch.

You can find more information on page 259

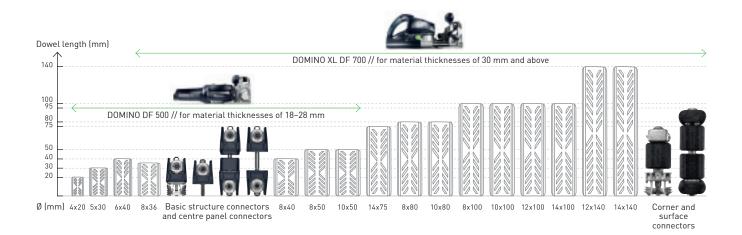

Routing height and angle setting Time-saving and precise adjustment of the routing height and angle: For precise mitre routing and processing various material thicknesses. Using presettings or infinite routing angle adjustment.

Perfect connections made easy. **The DOMINO family at a glance.**

Every wooden joint has its advantages. The DOMINO jointing system combines them all.

DOMINO dowels made from beech and sipo

Beechwood DOMINOS bear the Pan European Forest Council (PEFC) quality seal for wood products originating from sustainable, well-maintained, responsible forest cultivation.

DOMINO dowels made from sipo are resistant to weather, insects and mould, making them ideal for outdoor applications.

10 Planing

EHL 65 one-hand electronic planer

HL 850 electronic planer

Modified slightly. Improved decisively. The one-hand electronic planer.

Weighing just 2.4 kg and with a compact design, the EHL 65 electric planer is not only the lightest one-handed planer in its class, but also the most powerful. With a 4 mm planing and 23 mm rebate depth and excellent surface finish thanks to the unique spiral blade with pulling cut. With SoftGrip handle, single-button operation and non-slip ridges on the housing for a secure hold. In short: The one-handed planer for professionals.

| Technical data | EHL 65 |
|--------------------------------------|--------|
| Power consumption (watt) | 720 |
| Planer shaft speed (RPM) | 15.600 |
| Planing width (mm) | 65 |
| Planing depth (mm) | 0 - 4 |
| Max. rebate depth (mm) | 23 |
| Dust extraction connection dia. (mm) | 27 |
| Weight (kg) | 2,4 |

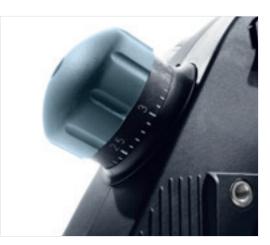

Stepless cutting depth adjustment

The infinitely adjustable cutting depth is a valuable feature in practice. You can use the rotating handle to accurately adjust the cutting depth, while carrying out your work.

Nothing quieter

The EHL 65 is significantly quieter than other planers. In fact, it is so quiet that it makes less noise under load than other planers do when idling. This is an important contribution to safety while working. Yet another benefit of the special shape of the spiral blade.

| Items included | Order no. |
|---|-----------|
| EHL 65 | |
| EHL 65 EQ-Plus parallel side fence, hex key, WAF 2, in SYSTAINER SYS 2 T-LOC | 576601 |

Order no.

Planer with no limits. Our electronic planer.

Planing and producing rebates close to the edge: Thanks to the single-bearing planing head, the HL 850 electronic planer produces flush results with an unlimited rebate depth. No limit to the rebate depth, no rework required.

| Technical data | HL 850 |
|--------------------------------------|---------|
| Power consumption (watt) | 850 |
| Planer shaft speed (RPM) | 12.000 |
| Planing width (mm) | 82 |
| Planing depth (mm) | 0 - 3,5 |
| Max. rebate depth | 00 |
| Dust extraction connection dia. (mm) | 36 |
| Weight (kg) | 3,9 |

Accurate chamfering

No slipping or running off course: The 90° V-groove in the planer foot makes the HL 850 electric planer feel like it is gliding along a rail when chamfering boards and beams.

Texturing surfaces

Narrow, wide or rustic waves. Replacing the planing head for textured planing requires a single hand movement.

11 Edging

272 CONTURO edge bander

274 Trimming machine

275 Multifunction table

275 Adapter plate

The start of the perfect edge. The CONTURO edge bander.

Versatile and easy to operate, the CONTURO represents a genuine solution for manufacturing narrow or large workpieces and individual shaped parts, as well as affixing edging to workpieces or furniture components produced in small batches.

Edge bander CONTURO KA 65

For classic furniture edging or manufacturing of complex moulded parts with convex or concave curves. For finishes in wood, melamine or plastic. For variable edge heights of up to 65 mm and material thicknesses of up to 3 mm.

Edge trimming set **KA 65 Set**

From the trimming machine and spot repair scraper, through to abrasives and polishes – everything is sorted and clear to see in the SYSTAINER "Edge trimming set".

Low heating Device housing does not heat up, ensuring safety while working.

Unique cartridge gluing system

Easy, clean and efficient work as well as quick colour changes thanks to the unique cartridge gluing system. The glue is only ever melted as required, avoiding coagulation, discolouration and deterioration.

For an even wider range of applications

Four different adhesive colours (white, natural, brown and black) guarantee the perfect join quality, whatever your decor. And with the new polyurethane adhesive, waterproof and heat-resistant gluing (for example for bathroom and kitchen furnishings) is now easy.

Always ready to use Nozzle system that is easy to clean. Self-contained system that prevents the unwanted escape of glue.

The perfect edge finish. The MFK 700 Basic.

The final sanding process comes after the gluing and edge trimming: Cut off edge protrusion, smooth down the edge, perform finishing work on corners and polish the edge if necessary to high gloss. Ideal for routing edges: The Festool MFK 700 Basic edge router with spring-loaded ball bearing guide brake and chip deflector. This is designed specially for machining the most delicate edges without leaving behind any marks.

You can find more information on page 226

| Power consumption (watt) | 1.200 |

Trimming machine **KP 65/2**

Ergonomic handle location for easy, effortless trimming, even on thick edging. Patented eccentric fine adjustment for precision impact trimming.

| Technical data | KP 65/2 |
|-------------------------|-----------|
| Trimming height (mm) | 65 |
| Trimming thickness (mm) | 2 |
| | |
| Items included | Order no. |
| KP 65/2 in carton | 499896 |

The precise cut

Tabletop on both sides of the trimming machine allows the user to trim left and right panel edges from above – with a perfect view of the workpiece. Impact trimming function (for round tables) and trimming of panel edges (final trimming) with a single machine.

Multifunction table MFT/3 CONTURO

This stationary working method is very practical for straight edges along small or narrow workpieces that are difficult to clamp. The edge is inserted in the usual way, the workpiece is then guided along the rail while even pressure is applied to the contact roller.

The CONTURO as a stationary machine

Not only can you affix edging to straight edges or curves, but also oblique edges with an angle of $90^{\circ}-45^{\circ}$ because the CONTURO can be tilted $90^{\circ}-45^{\circ}$ in the stationary unit.

Adapter plate **AP-KA 65**

For stationary use of the edge bander. Installation of the adapter plate in a self-constructed table frame or in the MFT perforated top intended for it. For small batches, straight edges, freeform elements and gluing inclined edges, angle of $0-47^{\circ}$.

| Technical data | AP-KA 65 |

12 Stirring

MX 1200/2, MX 1600/2 stirrers

Robust. Ergonomic. With perfect extraction. The Festool stirrers.

Thick clouds of dust while stirring are a thing of the past: The MX stirrers, including MX extraction around the edge of the bucket, enable you to mix any material with no dust. A welcome breath of fresh air not only for your lungs – but for your back, too. The flexible ErgoFix height adjustment enables you to work while standing, protecting your back. The combination of their powerful motors and robust gear units mean that these machines offer maximum power and a long service life. One more bonus: Your construction site stays clean – before, during and after stirring.

Ergonomic – mix while standing upright

Simply adjust your stirrer to match your height with the patented ErgoFix height adjustment system. Mix in a natural upright working position for relaxed and effortless working.

Effective extraction as soon as material is poured in The MX extraction system is simply clamped onto the edge of the mixing bucket so that the dust disappears into the extractor from the moment the mixing material is poured in. You no longer have to battle with clouds of dust while stirring. And after your work is done, the construction site is as clean as before, saving you valuable time.

Extremely sturdy design

The stirrers can withstand the toughest of conditions, from heavy contamination to hard impact or collisions, thanks to their durable drive, switch guard and rubber edges.

NEW

Dust-free work begins with stirring. **MX extraction.**

No dust exposure when pouring and mixing powdered materials – the MX extraction solution is simply secured to the edge of the bucket and ensures that the dust ends up in the extractor, not in your lungs. For a clean working environment with no rework required.

Also available as an accessory without stirrer: See page 285 for more details

Extremely powerful for harsh industrial environments.

The powerful stirrers for large quantities.

The MX 1200/2 and MX 1600/2 stirrers can withstand the toughest of conditions, from heavy contamination to hard impact or collisions. The even more powerful motors and high-torque two-speed gearbox are perfect for major, heavy-duty mixing applications: First gear for viscous and heavy materials, second gear for simple and fast mixing of liquid materials.

All within easy reach

A tubular steel frame ensures maximum robustness and parallel rubber-coated handles enable the user to guide the machine with ease and comfort.

Faster. Lighter. More intensive. The two-spindle stirrer.

For up 50% more speed, the DUO stirrer works with two spindles working in opposite directions: The two stirring rods interlock, thereby speeding up the mixing of the material. Perfect mixing results with considerably less exertion for the user.

Work more easily

Working with the DUO saves even more energy. The stirring rods working in opposite directions cancel out the torque. You guide the tool through the material with virtually no torque.

Lightning-quick changes without using tools

The FastFix quick-change system allows the machine and stirrer basket to be separated without the use of tools and enables rapid replacement of the stirrer basket, as well as simple cleaning and space-saving transportation.

Hardly any dust: Good for your health. And for your customers. The RENOFIX RG 130 E surface-restoration grinder, when combined with the CTM 36 AC RENOFIX mobile dust extractor and the CT-VA pre-separator, achieves excellent extraction results and guarantees dust-free work. Your customers will be amazed by how clean their workspace is.

Wall-to-wall floor sanding

The folding brush segment enables tile and parquet adhesive residue to be removed right up to the wall. Thanks to the diamond disc, recessed by 0.5 mm, no wall damage occurs.

The RENOFIX RG 130 surfacerestoration grinder makes a real impression with its high removal rate – for perfect substrate preparation that guarantees flawless results.

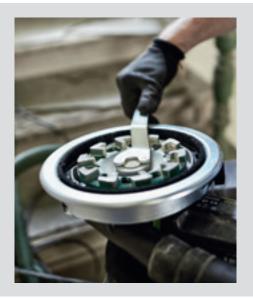

Optimal guidance – precise removal The guide table allows the surface-restoration grinder to be guided safely. What's more, the removal height can be variably adjusted so that you don't remove any more material than required.

Replaceable diamond discs. Always adapted to the working material.

Whether you are working with concrete, screed, paint, adhesive or other coatings: The DIA HARD, ABRASIVE, STONE, THERMO and PAINT diamond discs can handle it all. And any disc can be swapped out for another in just a few simple steps.

The optimal solution for material removal during renovation and restoration.

The RENOFIX renovation millers.

Fast working with powerful electronics for constant speed. With the RENOFIX renovation millers, thanks to the wide range of accessories, both hard and soft materials can be removed.

| Technical data | RG 80 | RG 150 |
|--------------------------------------|---------------|---------------|
| Power consumption (watt) | 1.100 | 1.600 |
| Idle engine speed (RPM) | 2.000 - 5.900 | 1.000 – 2.200 |
| Tool dia. (mm) | 80 | 150 |
| Tool holder | 2 x M5 | D14/M8 |
| Dust extraction connection dia. (mm) | 36 | 36 |
| Weight (kg) | 3,5 | 6,2 |

Work adapted to the material

For precise, dust-free work on porous substrates, a speed adapted to the material is key. The speed of the RENOFIX renovation millers can therefore be controlled electronically.

Compact, handy, ergonomic

The slimline motor housing, the additional hand grip, the dome grip above the transmission housing and the stable extraction pipe of the RG 80 enable individual handling options – for comfortable hand positions in every working situation.

Wallpaper perforator **TP 220**

Completely new operating principle: Due to the rollers, which are quickly rotating at different speeds, funnel-shaped openings are produced that let water optimally flow in behind the wallpaper and then penetrate into it.

| Technical data | TP 220 |
|--------------------------------|----------------|
| Telescoping handle length (mm) | 900 - 1.300 |
| Max. depth adjustment (mm) | 3,5 |
| Cutting diameter (mm) | 45 |
| Dimensions (L x W x H) (mm) | 168 x 224 x 52 |
| Weight (kg) | 1,5 |

Protects the subsurface

The wallpaper penetration depth of the rollers can be set precisely, thereby protecting the wall against damage.

| Items included | Order no. |

14 Cutting

298 Cordless angle grinder

Freehand diamond cutting systems

Diamond cutting systems

The robust solution for cutting and grinding. The cordless angle grinder.

The AGC 18 cordless angle grinder is dust-resistant and extremely durable thanks to the enclosed brushless EC-TEC motor and protected electronics. Its continuous adjustable speed from 4500 to 8500 rpm allows for cutting and grinding that is suitable for any material.

| Technical data | AGC 18 | |
|------------------------------|---------------|--|
| Battery voltage (V) | 18 | |
| Idle engine speed (RPM) | 4.500 - 8.500 | |
| Disc dia. (mm) | 125 | |
| Spindle thread/flange | M14 | |
| Li-ion battery capacity (Ah) | 5,2 | |
| Weight with Li-ion (kg) | 2,7 | |

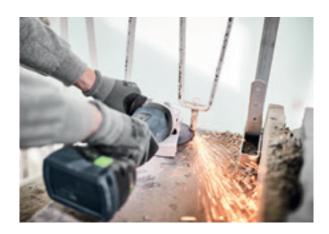

Impressively ergonomic

The design is logically set out for optimal operation in cutting work. For especially smooth operation and fewer vibrations, the motor and housing are disconnected from each other.

All-inclusive safety while working

Soft start-up, electronic overload protection, motor brake and restart protection ensure safe work.

| Items included | i de la constanción d | Order no. |

Accurate separating cuts without dust even with a battery.

The freehand diamond cutting systems.

To safeguard health when working, the dust extraction attachment for freehand cutting systems transports over 95% of the dust directly into the mobile dust extractor - making it ideal for dust-free cutting work on mineral materials in interiors. The open design allows a clear view of the cutting line for easy orientation on the scribe mark.

Cordless freehand cutting system **DSC-AGC 18 FH**

Time-saving thanks to the Bluetooth® battery pack*, which starts a paired CLEANTEC mobile dust extractor automatically when the tool is switched on.

| Technical data | DSC-AG 125 FH |
|--------------------------------------|----------------|
| Power consumption (watt) | 1.400 |
| Idle engine speed (RPM) | 3.500 - 11.000 |

Vibration and emissions values can be found in the operating manual at www.festool.com/vibration You can find more information on Bluetooth® Autostart on page 23 * The versions with Bluetooth® technology are not available in all countries. Please contact your local dealer for further information.

Precise, unrestricted cutting

The dust extraction attachment provides a clear view of the cutting line and can be opened to allow work close to edges.

Cut dust-free easily

With a cutting depth of 27 mm, ideal for cutting mineral panel materials like tiles and natural stone.

Precise cutting without dust. The diamond cutting systems.

Gone are the days when cutting and grinding work was a dusty affair. The hazardous dust is now extracted reliably, the health of the user is protected and a free view of the workpiece guaranteed. A combination of compatible machines, accessories and consumables provides the perfect solution for efficient, perfect and accurate working progress.

Diamond cutting systems | Cutting 14

More precise cutting

The DSC-AG 125 and the DSC-AG 230 can be used on the Festool guide rail and therefore open up new applications. This makes cutting materials of any size simple and precise.

Simply insert

The integrated plunge-cut function makes it possible to start cutting anywhere in the material. Simply insert at the point where the material is damaged and cut to the pre-selected cutting depth.

15 Illuminating

SYSLITE UNI working light

SYSLITE KAL II working light

SYSLITE DUO working light

SYSLITE STL 450 surface control light

See everything. Work with more precision. The right light for every situation.

Whether you choose the SYSLITE DUO or SYSLITE KAL working lights, the handy SYSLITE UNI or the SYSLITE STL 450 surface inspection light – all are designed to simplify your work. They provide excellent lighting for every situation – from small surfaces through to entire rooms. Because high-quality lighting is essential for good work.

Torch SYSLITE UNI

Small and compact for ultimate mobility. Compatible with all Festool battery packs.

Working light SYSLITE DUO

Extensive illumination (mains-powered) of entire rooms with light quality that replicates daylight. Can be used in a wide variety of ways: Stands alone, is attached to a Festool tripod or, if preferred, is hung on a hook using the suspension means on the rear.

Working light SYSLITE KAL II

Turns dark surfaces into work surfaces in an extremely versatile manner. Can be positioned or suspended in five positions and powered by a wide variety of sources (internal battery, battery pack, mains cable or car charger).

Grazing light SYSLITE STL 450

The inspection light optimally focuses the light – ideal for inspecting surfaces even when working. Variable height and inclination with compatible tripod and long cable for a large range of applications.

16 Systainer

Systainer³ combines workshop and construction site.

NEW

The new Systainer³ generation enables you to be more mobile than ever before. Festool, TANOS and bott have collaboratively developed a mobility system that brings the workshop and the construction site closer together. It is perfectly integrated into Bott vario3 vehicle equipment, allowing you to safely deploy the familiar arrangement and simple handling that you are used to from the Systainer system in your vehicle as well.

Secure connection

All Systainer³ can be connected to one another and to other generations.

Combines three functions

The central control element of the Systainer allows you to lock, open, or connect with a single turn. The Systainer can always be opened with no need to decouple it.

Systainer³

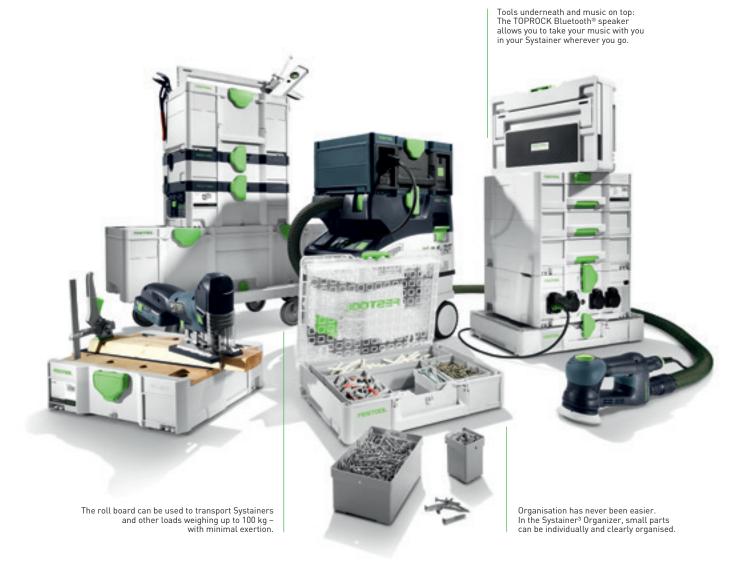

Systainer³ Organizer

Systainer³ ToolBox

Simply tidier, more clearly arranged and better organised.

For a long time now, Systainers have been more than just storage boxes for highquality tools. They bring organisation, mobility and time savings to the workplace. Festool has been setting standards when it comes to functionality with the Systainer organisation system since 1993. The Systainer³ is yet another milestone – and, like all Festool solutions, fits perfectly into the system.

Festool creates new innovations – and new standards. We will gradually be converting our portfolio to the Systainer³ system.

All information on this can be found at any time on www.festool.com/mobility

The portable electrical outlet module. The SYS-PowerStation.

The SYS-PowerStation* provides power. Even where there would otherwise be none. As a high-performance battery storage solution, it allows users to be independent of traditional power sources, such as electr ical outlet modules, generators or site distribution boards – to guarantee predictable everyday work. Without the need to find a power supply or the hassle of pulling cables, overloaded site distribution boards or problems with fuses switching off. Just like a normal 230 V electrical outlet module.

Available in 2021

SYS-PowerStation SYS-PST 1500

The SYS-PowerStation powers tools and machines from any manufacturer – they can all still be used and handled in the usual system. Thanks to the highquality power, even electronically sensitive machines can be operated without a hitch.

Power. Anytime, anywhere The SYS-PowerStation stores 1500 watt-hours of energy – for most applications, that is enough for an entire working day.

High performance

With 3680 watts permanent power and up to 11,000 watts short-term power, it provides enough energy to power all mains-powered tools – even extractors, large saws and hammer drills – continuously with no losses of performance.

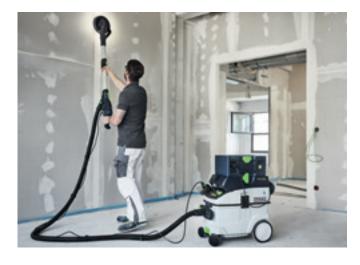

Dust-free work

Turns every extractor into a cordless extractor – and operates an additional tool at the same time via the electrical outlet module on the extractor. This means that you can now work with dust extraction anywhere.

Planning

Every construction site operation can be safely planned from now on. The availability of power is no longer an element of uncertainty.

| SYS-PowerStation | Workplace organisation | 17 |
|------------------|------------------------|----|
|------------------|------------------------|----|

Compact and mobile

Weighs only 16 kg in the practical Systainer format – and can be carried upright with the carrying handle at the front of the Systainer. Compatible with the entire Festool Systainer system and bott vehicle equipment.

Innovative

Its completely new, globally innovative technology makes the SYS-PowerStation a high-performance battery store: Outstanding performance values, long usage times and short charging times in compact Systainer form, weighing just 16 kg.

For your safety: Only use with devices that do not require an earthed power supply (therefore do not use the TKS 80 with the SYS-PowerStation). Exceptional: It goes without saying that you are fully covered thanks to the comprehensive support provided by the Festool SERVICE (including the "Replaced in the event of theft" service – with increased deductible).

Always sounds good. At work. And on the phone. The SYSROCK construction site radios.

The SYSROCK construction site radios fit on every windowsill and combine compact dimensions with a low weight and impeccable sound. And thanks to the Bluetooth[®] interface, you can listen to your favourite radio stations and tracks from your smartphone with SYSROCK sound quality.

The Sound of Systainer. The Bluetooth[®] TOPROCK speaker.

TOPROCK is the newest band member of the Festool sound family. The Bluetooth[®] speaker in the Systainer³ lid combines all the advantages of the Festool Systainer system in perfect harmony. Four high-performance speakers, combined with the cleverly designed resonance chamber, provide a clear and voluminous sound. Do you want even more? Simply connect two TOPROCK speakers to your smartphone and enjoy a stereo sound which fills the room.

1 table. 1000 possibilities. The MFT 3 multifunction table.

Creates professional work conditions right from the assembly stage. It's flexible clamping and processing options for large and small workpieces make the multifunction table MFT 3 probably the most diverse worktop in the world.

Multifunction table **MFT/3**

The working height of 90 cm is ideal to prevent back strain. Additionally, the MFT 3 is quite easy to fold away for space-saving transport.

| Technical data | MFT/3 |
|-------------------------------------|-------------|
| Table dimensions (mm) | 1.157 x 773 |
| Table height, legs folded away (mm) | 180 |
| Table height, legs unfolded (mm) | 900 |
| Max. workpiece thickness (mm) | 78 |
| Max. workpiece width (mm) | 700 |
| Load capacity (kg) | 120 |
| Weight (kg) | 28 |

| Items included | | Order no. | |

Turns the construction site into your workshop. The mobile workshop.

The workshop that you can take with you – for ideal working conditions even on the construction site. Effortless transportation between workshop, vehicle and construction site is ensured by its low weight, compact dimensions and good mobility on stairs. It is immediately ready for on-site use, with no need for time-consuming assembly.

Mobile workshop **MW 1000**

Ideal connection to the Festool SYSTAINER world – everything fits together. Just as compatible: All accessories for the MFT multifunction table.

Set safe and sound. The mobile saw table and work bench.

Thanks to the wooden coverings, sheet material and workpieces are optimally supported for all machining tasks. What is special about it: Even boards up to 3100 x 2150 mm in size can be held by a single person without difficulty or additional assistance, enabling precise machining.

| Technical data | STM 1800 |
|--|-------------------|
| Table dimensions (LxWxH) when folded (mm) | 1.150 x 250 x 700 |
| min. contact surface (mm) | 1.100 x 1.050 |

| Weight (kg) | 34 |

| Items included | Order no. |
|---|-----------|
| STM 1800 fitted wooden coverings, four extension pipes with wooden coverings, in carton | 205183 |

Can be operated by one person

For sheet material up to 3100 x 2150 mm. The bench can be tilted further so that the board can be held even more easily.

Precise cutting of sheets In combination with guide rail, portable circular saw and 90° angle stop FS-WA/90°.

NENA/

90° angle stop FS-WA/90°

Shows you where to go. The aluminium stop milled from a single piece guarantees precise and reproducible perpendicular $90^{\circ}\ {\rm cuts}\ {\rm without}\ {\rm any}$ readjustments. Thanks to the quick-change system, the angle stop can be secured to the guide rail in just a couple of movements.

| | 100 | my'e | |
|--|-----|------|--|
| | | | |

| Items included | Order no. |
|------------------------|-----------|
| FS-WA/90° in carton | 205229 |

Precise 90° cuts The angle stop is fixed to the workpiece using fastening clamps.

Height adjustment

For ergonomic work that protects your back when routing, sawing and gluing workpieces.

Mobile and compact

The saw table is equipped with robust rollers and can be folded for transportation.

Impeccable guidance. The guide rails.

Invented and perfected by Festool: The guide rail. For cuts and grooves that impress thanks to their precision. With a slideway lining for the smooth running of the machines, a groove for the fastening and lever clamps or the splinterguard for splinter-free sawing.

| Items included | | Order no. |

A third hand In many cases replaces the assistant when it comes to having a free hand for marking, clamping, gripping, etc.

The future of clamping. The VAC SYS vacuum clamping system.

Dynamic holding force, gentle on the surface: With the VAC SYS vacuum clamping system, workpieces can be machined on all sides in a single step, without laborious re-clamping and without leaving a mark. From the surface all the way to the edge. And with radii that cover a 360° rotation and a cutting angle adjustment of up to 90°. This produces a brand new level of freedom and the optimum preconditions for healthy and ergonomic work.

Vacuum clamping system **VAC SYS**

Not only the pad but also the clamping unit itself harnesses the power of the vacuum that is generated to secure the unit to the work bench. Screws or clamps can be used as an alternative.

| Technical data | VAC SYS | |

Twice as powerful

For especially large, heavy and curved workpieces, a second clamping unit can be connected to the VAC SYS pump.

For efficient work processes. The mobile organisation centre.

The best way to organise your workspace: In a single tool, you can store all your machinery, accessories and even mobile dust extractors, and have these immediately on hand and ready to use. And if you ever need to switch workstations within the workshop, our centre can quite easily be transported to the new location along with you.

UCR 1000

Set consisting of MFH 1000 multifunction

stool and WCR 1000 Workcenter.

Workcenter WCR 1000

The Workcenter can not only be connected to the multifunction stool, but also with all Festool mobile dust extractors with T-LOC. Moreover, it offers a large storage area for SYSTAINER units and a number of hooks for accessories and machines.

Multifunction stool **MFH 1000**

The multifunction stool not only serves as a stable and comfortable seat, but is also the basis for the WCR 1000 Workcenter.

Toolcenter TC 3000/2

Can be used flexibly while still offering ample space to work. Additionally, Systainers up to SYS3 M 237 can be stowed in the lockable compartment.

| | Feather key WCR 1000 PF 2x for WCR 1000, UCR 1000, The keys enable the attachment of individual accessories to the profiled groove, 2x keys incl. bits, in self-service display pack | 497476 |
| | Pegboard hook LWH HSK-A for WCR 1000, MFH 1000, UCR 1000, for hanging hand sanding blocks HSK-A 80x130, HSK-A 80x200 and HSK-A 115x226, not suitable for hand sanding block HSK-A 80x400, the protective coating prevents damage, dimensions length x width 38,1 x 38,1 mm, in carton | 498968 |
| | Tool hook WCR 1000 WH for WCR 1000, UCR 1000, for hanging two tools, for use as a hose holder, in carton | 497474 |
| | Hook WCR 1000 SHQ for WCR 1000, UCR 1000, Standard hooks for mounting on the pegboard, qty. in pack 6 Units, in self-service display pack | 497475 |
| > | Holder for spray gun WCR 1000 LPH for WCR 1000, holder for paint gun, for assembly at the profile groove for the WCR 1000 Workcenter, 2x screw, 2x square nut, dimensions (L x W x H) 148 x 76 x 60 mm, weight 0,5 kg, in carton | 498361 |
| | Storage surface WCR 1000 AB for WCR 1000, UCR 1000, Large storage surface for placing sundries, boxes of abrasives or screws, etc., in carton | 497477 |
| | Rear wall TC 3000 RW for Toolcenters TC 3000, TC 3000/2 incl. 10 hooks, dimensions length x width 990 x 340 mm, in carton | 452986 |
| AA | Tool holder WHR/D-TC for the TC 2000, TC 3000, TC 3000/2, for safe, ergonomic storage of two electric and air tools at the same time, in carton | 493415 |
| 531 | Hose holder TC-SH for the TC 2000, TC 3000, TC 3000/2, for retrofitting TC 3000, in carton | 487304 |
| 1 | Service unit VE-TC 3000 for Toolcenter TC 2000, TC 3000, for compressed air supply to mobile dust extractors CT 22/33 and SR 151, SR 200 series dust extractors in LE design, in carton | 454808 |

For greater ease of movement. The energy box and the boom arm.

Extended action radius and central control: Thanks to the energy box EAA and the boom arm ASA. They hold tools within easy reach, supply energy and extract automatically. For increased mobility and efficiency when working.

| Technical data | ASA 5000 | ASA 6000 | EAA |
|------------------------------|----------|----------|-----------------|
| Connecting cable length (m) | 3 | 3 | - |
| Boom extension (m) | 2 x 2,5 | 2 x 3 | - |
| Application area (m²) | 39 - 58 | 56 - 84 | - |
| Cutting angle adjustment (°) | 39 - 58 | 56 - 84 | - |
| Dimensions (L x W x H) (mm) | - | - | 516 x 580 x 367 |
| Pressure range (bar) | - | - | 4 - 8 |
| Weight (kg) | 92 | 105 | 13 |

Workplace changes made easy

Boom arms are primarily used in locations where workplaces need to be flexible or where a larger operating radius is required. Power and dust extraction is supplied where it is needed, while avoiding tripping hazards. This saves you time moving equipment and creates more space in the workshop.

Manually adjustable Adjustment of the slide valve provides suction power wherever an electric and/or air tool is in operation.

| Items included | | Order no. | |
|----------------|---|-----------|---|
| ASA | A All variants: double-jointed arm with wall bracket, wall mounting components are not included, in carton | | |
| | ASA 5000 CT/SR | 583867 | |

| | Energy box module EAA CT 26/36/48 for CT 26/36/48, for connecting a CT mobile dust extractor with an energy box or boom arm, in carton | 496143 |

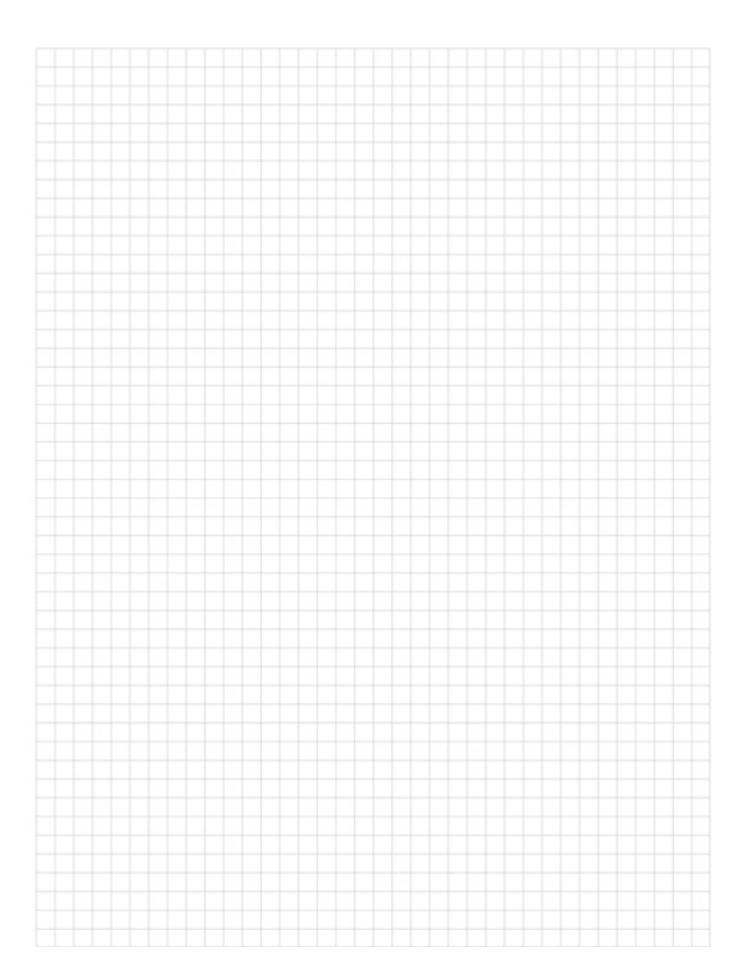

IAS 3 hose from page 126

plug it. One cable for all devices.

The plug it-system is not only much more practical, quicker and convenient but also more economical. In the event of a cable break (a frequent cause of electric power tool failure) downtimes are reduced because the cables on Festool tools are not integrated into the interior of the machine: you simply plug in another cable and carry on working! This means no costly repairs, and minimal downtimes. Needless to say, a plug it-connector can be retrofitted to tools that do not already have one.

Product identification key

General notes on the catalogue:

01 Remember to use appropriate protective devices or wear personal protective equipment when using Festool products such as compressed air and electric power tools together with their accessories and consumable materials or when machining hazardous materials. For further information, please refer to the relevant safety documentation or consult our customer service if you have questions.

02 Machine specifications included in the catalogue, such as quantity specifications, time savings, coverage capacities, etc., are average values and may deviate significantly, depending on the material being processed. The manufacturer does not guarantee that the values will be achieved in each individual case. Your Festool specialist dealer will be glad to answer any queries you may have concerning this matter.

03 The machine weights that are specified in the catalogue usually refer to the weight of a machine ready for use including a standard insertion tool, but without a cable, accessories or consumables. Please note that the weights stated may deviate from the specifications in the catalogue, depending on the insertion tool, battery pack, accessories or other additional parts used.

04 All trademark rights, patent rights and other commercial property rights mentioned in this catalogue remain the property of the relevant beneficiary, even in cases where this is not explicitly stated. The reproduction in particular of common names, trade names, goods designations, etc. in this catalogue (even if not identified as such) does not render these names exempt from trademark or brand protection legislation and does not therefore authorise anyone to use them.

05 We reserve the right to make modifications, especially to technical data or specifications, without prior notification. Individual features may vary depending on country-specific conditions.

06 Products may differ from those shown and the images may at times present components or parts that are not included as standard with the tools. If you have any questions, please contact your Festool specialist retailer.

07 Safety: All power tools and compressed air tools listed in this catalogue conform to the valid and applicable IEC or EN safety standards, depending on the type of tool (e.g. IEC/EN 61 029, IEC/EN 60 745, IEC/EN 62 841, IEC/EN 60 335, EN ISO 11 148, IEC/CISPR/EN 55 014, IEC/EN 61 000).

08 CE conformity: All power tools and compressed air tools listed in this catalogue comply with the provisions of the relevant applicable EU directives (e.g. Machinery Directive 2004/42/EC, Low Voltage Directive 2014/35/EU, EMC Directive 2011/45/EU, Directive on the provision of radio equipment 2014/53/EU, Directive on equipment and protective systems intended for use in potentially explosive atmospheres 2014/34/EU).

09 ISO certification: All the power tools and compressed air tools listed in this catalogue are manufactured in our production plants which are certified in accordance with DIN EN ISO 9001 certified.

10 The Bluetooth® word mark and the logos are registered trademarks of Bluetooth SIG, Inc.; they are used by TTS Tooltechnic Systems AG & Co. KG, and therefore by Festool, under licence. The versions with Bluetooth® technology are not available in all countries. Please contact your local dealer for further information.
